SCHOOL OF AUDIOLOGY & SPEECH LANGUAGE PATHOLOGY

Audiology and Speech Language Pathology is an upcoming field in allied health sciences. There is a dearth of Speech Language Pathologists and Audiologists in India as very few colleges provide educational facilities in this field. Bharati Vidyapeeth (Deemed to be University) decided to fulfill this long-standing deficiency in Maharashtra by starting a School of Audiology and Speech Language Pathology (SASLP) in the educational capital, the city of Pune under the medical faculty in August 2006. SASLP is located at the Dhankawadi Campus of Bharati Vidyapeeth (Deemed to be University).

ABOUT AUDIOLOGY AND SPEECH LANGUAGE PATHOLOGY

Audiology is a branch of science that deals with hearing and hearing related disorders. Students of Audiology are educated regarding the anatomy and physiology of the normal and abnormal auditory system. They are trained in identification and differential diagnosis of auditory disorders. These include disorders of the middle ear, inner ear, auditory nerve and the central auditory nervous system. With training, students develop expertise in audiological rehabilitation, which includes recommendation of amplification devices including hearing aids and cochlear implants. They also learn about assessment and management of individuals with tinnitus, vestibular disorders and auditory processing disorders.

Speech and Language Pathology deals with the normal and abnormal aspects of voice, speech, language and swallowing. Students of Speech Language Pathology are trained in diagnosis, differential diagnosis and management of speech and language disorders, which includes voice disorders, speech sound disorder, stuttering, speech and language problems associated with hearing impairment, intellectual disability, cerebral palsy, cleft palate, autism spectrum disorders, oral and laryngeal cancers, stroke/ paralysis, and learning disorders.
