BHARATI VIDYAPEETH UNIVERSITY

COLLEGE OF NURSING SANGLI

Syllabus

Basic B.Sc Nursing

BHARATI VIDYAPEETH UNIVERSITY

INTRODUCTION

Bharati Vidyapeeth, which is the parent body of Bharati Vidyapeeth University, was established on 10th May 1964 by Dr Patangrao Kadam with the wider objective of contributing to intellectual awaking and social cultural transformation through dynamic education. Under the imaginative dynamic and socially committed leadership of the founder Dr Patangrao Kadam, Bharati Vidyapeeth has made astonishing strides in the field of education. The Vidyapeeth has so far established 156 educational institutions imparting education to the student's right from pre primary stage to post graduate stage and Ph.D.The Ministry of Human Resources Development (Department of Education, Government of India) on the recommendations of the University Grants Commission New Delhi through their notification No F.9 – 15/95 U.3 dated 26th April 1996 has declared institution of Bharati Vidyapeeth at Pune as University.

- 1. The Medical College
- 2. The Dental college and hospital
- 3. The College of Ayurved Pune
- 4. The Homeopathic Medical college
- 5. The College of Nursing Pune
- 6. Yashwantrao Mohite College of Arts, Commerce and Science.
- 7. The New College Pune
- 8. Social Science center (M.S.W) Pune.
- 9. Yashwantrao Mohite Institute of Social Science and Research, Pune.
- 10. The Research and Development Centre in applied chemistry (POLYMER), Pune.
- 11. The College of Physical education Pune and
- 12. The Institute of Environment Education and Research, Pune.

The association of the Indian Universities has accepted this university as its member.

This is probably the first and only university having under its umbrella with diversified disciplines of professional and non professional categories such as Medicine, Dentistry, Nursing, Ayurved, Homeopathic Medicines Physical Education Natural and Physical Science Social Science Commerce Law and Humanities. The Degrees and diplomas awarded by this university have the same status and recognition as those awarded by any Indian University recognized by the University Grants Commission, New Delhi. The University operates its educational programmes in accordance with the rules regulations and guidelines of various statutory Central Government bodies Medical Council of India, Dental Council of India, Bar council of India, Indian Nursing council, Central Council of Indian Medicine etc.....

College of Nursing, Pune.

Bharati Vidyapeeth College of Nursing was established in the year 1992 with prior permission of the University of Pune to which it was having affiliation. It is now the constituent unit of this university. This is the first college of Nursing in the Non Government Sector in Pune. Adequate facilities for clinical studies have been provided and the college is attached to the hospital of Bharati Vidyapeeth Medical Foundation. Dhanakwadi Pune. The College has the approval of the government of India, UGC and Maharashtra Nursing Council. The College has a separate hostel facilities for boys and girls. The curriculum and the syllabus is made and updated as per the present needs in the Maharashtra Nursing Council and the needs of the society.

College of Nursing, Wanlesswadi, Sangli

Bharati Vidyapeeth University, college of nursing, started in 2007 at Bharati Vidyapeeth University campus, Sangli. It is one of the constituent units of the Bharati Vidyapeeth University.

This college started with the objectives of training the students to become competent nurses for first level positions in nursing, to provide quality care in hospitals and to community and thereby contributing to health care of our nation. The college has the permission from Maharashtra Nursing and Indian Nursing council.

The college is equipped with nursing arts, community health & nutrition laboratories, teaching aids & a departmental library Since we have our own Medical college in the same campus, our students get exposure to the teaching of faculty members having expertise in Anatomy, physiology, biochemistry, pathology & microbiology & other subjects. Similarly, our students also have access to the library of our Medical College, which has a very vast collection of reference books. Our college also subscribes to journals and makes audio- video material & equipment available to the students. Hostel facilities with modern amenities are available to our student on the campus. The atmosphere in the college is very congenial for professional growth.

PHILOSOPHY OF BHARATI VIDYAPEETH

Bharati Vidyapeeth was established in May 1964 with the philosophy of contributing to the intellectual awakening and social transformation in different spheres including educational economic social and cultural fields in India and more particularly in Maharashtra. Its activities are been geared to bring about all sided progress and welfare of different sections in population including women tribal and rural people.

Bharati Vidyapeeth's Nursing College also functions within the framework of Bharati Vidyapeeth's philosophy.

AIMS:-

To prepare first level of nurse manager who can take the responsibility in hospitals, community and educational Institutions and give primary, secondary and tertiary care.

OBJECTIVES:-

After completion of 4 year B.Sc Nursing Course

- 1) The students will be able to develop skills in providing quality care by using nursing process in different clinical settings.
- 2) Students will be able to render comprehensive care to family and community by using nursing process.
- 3) Student will be able to take leadership role at first level management in nursing service and education.
- 4) Student will be able to participate in promotive, preventive and restorative health care delivery system.
- 5) Students will practice ethical values in nursing profession
- 6) Students will aware of research methodoly and will be capable of assisting in research projects.

ADMISSION REQUIRMENTS:

- 1. The minimum age for admission shall be 17 years on or before 31st Dec of the year of admission.
- 2. The minimum educational requirements shall be passing of Higher Secondary School certificate Examination (12 years course).

Or

Senior School certificate examination (10+2), pre-degree examination (10 + 2) OR

An equivalent with 12 years schooling from a recognized board or university with Science (physics Chemistry, biology) and English with minimum of 45 % aggregate marks (PCB)

3. Candidates shall be medically fit.

ENTRANCE / SELECTION TEST

Selection of candidate should be based on the merit of entrance examination held by University or competent authority.

DURATION

Duration of course will be for four years excluding internship and one year bond is compulsory in Bharati Vidyapeeth.

VACATION

Eight weeks vacation shall be given each year.

ATKT

Any candidate failing in more than two subjects will not be promoted to next year. (ATKT will be allowed only for two subjects)

AWARD OF CLASS.

FIRST CLASS WITH DISTINCTION	AGGREGATE 70% AND ABOVE
FIRST CLASS	AGGREGATE 60% AND ABOVE LESS THAN 70%
HIGHER SECOND CLASS	AGGREGATE 55% AND ABOVE LESS THAN 60%
SECOND CLASS	AGGREGATE 50% AND ABOVE LESS THAN 55%
FAIL	LESS THAN 50%

DURATION

COURSE DURATION	FOUR YEARS
Weeks per year	52 weeks
Vacation	8 weeks
Gazetted holidays	3 weeks
Examinations including preparatory	4 weeks
Available weeks	37
Hours per week	40 hrs
Practical	30 hrs per week
Theory	10 hrs per week
Internship and practical	48 hrs per week
Hours available per academic year	1480 (37 weeks x 40 hrs)

COURSE OF INSTRUCTION

FIRST YEAR

SUBJECT	Theory (in hrs)	Practical in Hrs Clinical	In Hrs
	(Class &	III's Chincai	
	lab)		
1.English*	60		
2.Anatomy	60		
3.Physiology	60		
4.Nutrition	60		
5. Biochemistry	30		
6. Nursing Foundation	265+200	450	
7.Psychology	60		
8.Introduction to computers	45		
9. **Marathi / Regional			
Language (optional)			
10. Library work / Self study			50
Total hours	920	450	50
Total hours =1420			

SECOND YEAR

Subject	Theory in hrs (class and Lab)	Practical in hrs (clinical)	In hrs
1.Sociology	60		
2.Pharmacology	45		
3.Pathology	30		
4.Genetics	15		
5.Medical Surgical Nursing	210	720	
(adults including Geriatrics-I)			
6.Community Health nursing I	90	135	
7.Microbiology	60		
8.Environment Science	50		
9.Library work self study			50
10.Co curricular activities			35
TOTAL HOURS	510	855	85
GRAND TOTAL HOURS = 1450			

THIRD YEAR

Sr.No	Subject	Theory in hrs (class and Lab)	Practical in hrs (clinical)	In hrs
1	1.Medical Surgical Nursing (including Geriatrics)	120	270	
2	2.Child Health nursing	90	270	
3	3.Mental Health nursing	90	270	
4	4.Communication and Educational Technology	60+30		
5.	5.Library work & self study			50
6	6.Co-curricular activities			50
	Total hours	390	810	100
	Grand total hours	1300		

FOURTH YEAR

Sr.No	Subject	Theory in hrs (class and Lab)	Practical in hrs (clinical)	In hrs
1	Midwifery & Obstetrical Nursing	90	360	
2	Community Health Nursing 11	90	135	
3	Nursing Research	45	*	
4	Management of Nursing service & Education	60+30		
	Total hours	315	495	
	Grand total 810			

• Project work to be carried out during internship

INTERNSHIP (Integrated practice)

48 hours per week.

Sr.No	Subject	Theory in hrs (class and Lab)	Practical in hrs (clinical)	In weeks
1	Midwifery & Obstetrical Nursing	,	240	5
2	Community Health Nursing 11		195	4
3	Medical Surgical Nursing including Geriatrics		430	9
4	Child Health nursing		145	3
5	Mental Health Nursing		95	2
6	Research project		45	1
	Total hours		1150	24
	Grand total 1150 hours			

Note:-

- 1. Internship means 8 hours of integrated clinical duties in which two weeks of evening and night shift duties are included.
- 2. Internship should be carried out as 8 hours per week.
- 3. Students during internship will be governed by nursing teachers.
- 4. Fourth year final examination to be held only after completion of internship.

SCHEME OF EXAMINATION

FIRST YEAR

SUBJECT	AS	ASSESSMENT Marks			
THEORY	Hours	Internal	External	Total	
1.Anatomy & Physiology	3	25	75	100	
2. Nutrition & Biochemistry	3	25	75	100	
3. Nursing Foundation	3	25	75	100	
4.Psychology	3	25	75	100	
5.English		25	75	100	
6.Introduction to computers		25	75	100	
7.Marathi	2		50	50	
Practical & Viva					
1.Nursing Foundations		100	100	200	

SECOND YEAR

SUBJECT	ASSESSMENT MARKS			
Theory	Hours	Internal	External	Total
1.Sociology	3	25	75	100
2. Medical Surgical Nursing I	3	25	75	100
3. Pharmacology, Pathology & Genetics	3	25	75	100
4.Community Health nursing I	3	25	75	100
5.Microbiology	3	25	75	100
6.Environmental Science	2		50	50
Practical & Viva				
1.Medical Surgical Nursing I		100	100	200

THIRD YEAR

Subject	ASSESSMENT			
Theory	Hours	Internal	External	Total
1.Medical Surgical Nursing II	3	25	75	100
2. Child Health nursing	3	25	75	100
3. Mental Health nursing	3	25	75	100
4.Communication & Educational	3	25	75	100
Technology				
Practical & Viva				
1.Medical Surgical Nursing II		50	50	100
2. Child Health nursing		50	50	100
3. Mental Health nursing		50	50	100

FOURTH YEAR

Subject	ASSESSMENT			
Theory	Hours	Internal	External	Total
1.Midwifery & Obstetrical Nursing	3	25	75	100
2. Community Health nursing II	3	25	75	100
3. Nursing Research & Statistics	3	25	75	100
4.Management of Nursing Service & Education	3	25	75	100
Practical & Viva				
1.Midwifery & Obstetrical Nursing	3	50	50	100
2. Community Health nursing II	3	50	50	100

Note:

- 1. Anatomy Physiology- Question paper will consist of section A, Anatomy of 37 marks and section B Physiology should be of 38 marks.
- 2. Nutrition and Biochemistry- question paper will consist of section A, Nutrition of 45 marks and section B Biochemistry should be of 30 marks.
- 3. Pharmacology, Pathology and Genetics Section A Pharmacology with 38 marks, section B Pathology of 25 marks and Genetics with 12 marks.
- 4. Nursing research and Statistics Nursing Research should be 50 marks and statistics of 25 marks.
- 5. Minimum pass marks should be 40% for English only.
- 6. Theory and Practical Exams for introduction to computers to be conducted at college exams Marks to be sent to University for inclusion in Mark list.
- 7. Minimum pass marks shall be 50% in each of Theory practical paper separately.
- 8. The candidate must have minimum of 80% attendance (Irrespective of the kind of absence). In theory and practical in each subject appearing of examination.
- 9. A candidate must have 100% in each of the Practical areas before award of the degree
- 10. A candidate has to pass in theory and practical exam in each of the paper.
- 11. If the candidate fails in either theory or practical exam he/she has to reappear for both the papers (theory and practical).
- 12. Maximum no of the attempts permitted for each paper is 3 including 1st attempt.
- 13. Candidate shall not be permitted to the subsequent higher examination unless the candidate had passed the previous exam.
- 14. The maximum period to complete the course successfully should not exceed eight years.
- 15. Maximum no of the candidates' practical examination should not exceed 20 per day.
- 16. All the practical examinations must be held in respective clinical areas.
- 17. One internal and one external examiner should be jointly conduct practical exam for each student.
- 18. An examiner should be a lecturer or above in a college of Nursing with M.Sc Nursing in concerned subject and minimum of 3 years teaching experience to be an examiner for nursing foundation course faculty having M.Sc nursing with any specialty shall be considered.

B.Sc. NURSING FIRST YEAR

ANATOMY

Placement: First Year

Time- Theory -60 hours.

Course Description: The course is designed to enable students to achieve knowledge of normal structures of various systems of human bodies and understand the alteration in critical structures in diseases and practice of nursing.

UNIT	of nursing. CONTENT	HOURS
UNIT- I	Introduction to anatomical terms, organization of the human	05 hrs
	body. Human cell structure Tiggues Definition Types Characteristics elegification	
	- Tissues- Definition, Types, Characteristics, classification,	
	location, function & formation.	
	 Membranes and glands classification and structures. Alteration in disease. 	
	- Application and implication in nursing.	
UNIT- 2	The Skeletal System.	06 hrs
	Bones- Types, structure, axial & appendicular skeleton.	
	- Bone Formation & Growth	
	- Description of bones.	
	- Joints classification and structure	
	- Alteration in disease.	
	 Application and implication in nursing. 	
UNIT -3	The Muscular system	07 hrs
	- Types and structure of muscles.	
	- Muscle group	
	- Alteration in disease	
	- Application and implication in nursing.	
UNIT- 4	The Nervous System	06 hrs
01111-4	- Structure of neurologia & neurons.	oo m s
	- Somatic Nervous system	
	- Structure of brain, spinal chord, cranial nerves,	
	- peripheral nerves	
	- Autonomic Nervous system-	
	- (Sympathetic, parasympathetic)	
	- Structure & location.	
	- Alteration in disease	
	- Application and implication in nursing.	
UNIT- 5	The Sensory Organs.	
	- structure of skin, eye, ear, nose, tongue (Auditory and	
	olfactory apparatus)	06 hrs
	- Alteration in disease	7 2
	- Application and implication in nursing.	

UNIT -6	Circulatory and Lymphatic system	07 hrs
01(11 0	- The circulatory system	0, 113
	-Blood – Microscopic structure	
	-Structure of Heart	
	-Arterial and venous system	
	-Circulation systemic, pulmonary, coronary.	
	- Lymphatic system	
	- Lymphatic vessels and lymph	
	- Lymphatic tissues	
	- Thymus glands	
	- Lymph nodes	
	- Lymphatic nodules	
	- Alteration in diseases	
	- Application and implication in nursing.	
UNIT-7	The Respiratory System	05 hours
	- Structure of organs of respiration	
	- Muscles of respiration Intercostals and diaphragm	
	- Alteration in disease	
	- Application and implication in nursing.	
	- Typineation and implication in harsing.	
UNIT-8	The Digestive system	06 hours
	- Structure of alimentary tract and accessory organs	
	of digestion	
	- Alteration in diseases	
	- Application and implication in nursing.	
UNIT – 9	The Excretory System (Urinary)	04 hrs
UNII – 9	- Structure of organs of urinary	04 1118
	- System: Kidneys, ureters, urinary bladder, urethra, structure	
	of skin.	
	-Application and implication in nursing.	
UNIT- 10	The Endocrine System	04 hrs
	-Structure of pituitary, pancreas, thyroid,	
	-Parathyroid, thymus and adrenal glands.	
	-Alteration in diseases	
	-Application and implication in nursing.	
UNIT- 11	The Reproductive System including Breast.	04 hrs
	- Structure of female reproductive organs.	
	- Structure of male reproductive organs.	
	- Structure of breast.	

PHYSIOLOGY

Time: Theory 60 hrs.

Placement – First Year

Course Description: The course is designed to assist the students to acquire knowledge of the normal physiology of various human body systems and understand the alteration in physiology disease and practice of nursing.

UNIT	CONTENT	HOURS
UNIT- 1	Cell physiology	04 hrs
	-Tissue –formation, repair - Membranes & glands- functions - Alteration in disease - Application and implication in Nursing	
UNIT – 2	Skeleton system	04 hrs.
	 Bone formation and growth. Bones- functions and movements of bones of axial & appendicular skeleton, bone healing Joints and joint movements. Alteration in disease Application and implication in Nursing 	
UNIT – 3	Muscular System	04 hrs.
	 Muscle movements, muscle tone, physiology of muscle contraction, levels and maintenance of posture. Alteration in disease Application and implication in Nursing 	
UNIT- 4	Nervous System	07 hrs
	 Function of neuralgia & neurons. Stimulus & nerve – impulse definition and mechanism. Functions of brain, spinal cord, cranial & spinal nerves. Cerebra spinal fluid – composition, circulation and function. Reflex arc reflex action and reflexes. Autonomic function- Pain – somatic, visceraland referred. Autonomic learning and biofeedback. Alteration in disease Application and implication in Nursing 	

UNIT-5	Circulatory System	
	-Blood formation, composition, blood groups, blood coagulation,	
	- Hemoglobin: structure, synthesis and breakdown. Variation of	
	molecules, estimation.	
	- Functions of heart, conduction, cardiac cycle, circulation-principles, control, factors influencing BP & pulse.	
	- Alteration in disease	
	-Application and implication in Nursing	
UNIT-6	The Respiratory System	06 hrs
	-Functions of respiratory system	
	- Physiology of respiration.	
	- Pulmonary ventilation, volume	
	- Mechanics of respiration	
	- Gaseous exchange in lungs - Carriage of oxygen & carbon dioxide	
	- Exchange of oxygen & carbon dioxide - Exchange of gases in tissues.	
	- Regulation of respiration	
	- Alteration in disease	
	- Application and implication in Nursing	
UNIT-7	The Digestive system	06 hrs
	-Functions of organ of digestive tract. Movements of alimentary	
	tract, digestion in mouth, stomach, small intestine, large	
	intestine, absorption of food, function of liver, gall bladder and	
	pancreas.	
	-Metabolism of carbohydrates, proteins, and fat.	
	-Alteration in disease	
	-Application and implication in Nursing	
UNIT-8	The Excretory system	05 hrs
	- Functions of Kidneys, ureters, urinary bladder, & urethra.	
	- Composition of urine	
	- Mechanism of urine formation.	
	- Functions of skin	
	- Regulation of body temperature.	
	- Fluid & Electrolyte balance.	
	Alteration in diseaseApplication and implication in Nursing	
UNIT -9	The Sensory Organs	
	The sometry organis	04 hrs
	- Functions of skin, eye, ear, nose, tongue.	
	- Alteration in disease	
	 Application and implication in Nursing 	

	-		
UNIT-10	The Endocrine System	05 hrs	
	 Functions of pituitary, pineal body, thymus, thyroid, parathyroid, pancreas, suprarenal, placenta, ovaries & testis. Alteration in disease Application and implication in Nursing 		
UNIT-11	The Reproductive System	05 hrs	
	 Reproduction of cells- DNA mitosis, meiosis, spermatogenesis, oogenesis. Functions of the female reproductive organs, functions of breast, female sexual cycle. Introduction of embryology Functions of male reproductive organs, male functions in reproduction, male fertility system. Alteration in disease Application and implication in Nursing 		
UNIT-12	Lymphatic and immunological system - Circulation of lymph - Immunity - Formation of T- cells & B- cells - Types of immune response - Antigen - Cytokines - Antibodies	02 hrs	

NUTRITION

Time: Theory 60hrs.

Placement- First Year

Course Description: The course is designed to assist the students to acquire knowledge of nutrition for maintenance of optimal health at different stages of life and its application for practice of nursing.

UNIT	CONTENT	HOURS
UNIT-1	Introduction -Nutrition - Concepts Role of nutrition in maintaining health Nutritional problems in India Factors affecting food & nutrition: socioeconomic, cultural, tradition, production system of distribution, lifestyle and food habits etc Role of foods & its medicinal values - Classification of foods - Foods standard - Elements of nutrition: macro and micro - Calorie, BMR	4 hrs
UNIT-2	Carbohydrates - Classification Caloric Value - Recommended daily allowances Dietary sources - Functions -Digestion, absorption and storage, metabolism of carbohydratesMalnutrition Deficiencies and over consumption	2 hrs
UNIT-3	Fats - Classification - Caloric value, Recommended daily allowances - Dietary sources Functions - Digestion absorption and storage, metabolism of fats - Malnutrition Deficiencies and over consumption	2 hrs

UNIT-4	Proteins - Classification - Caloric value - Recommended daily allowance - Dietary sources - Functions - Digestion absorption and storage, metabolism of proteins - Malnutrition Deficiencies and over consumption	2 hrs
UNIT 5	Energy - Unit of energy- kcal - Energy requirements of different categories of people - Measurements of energy - Body Mass Index (BMI) Basic metabolism - Basal metabolic rate (BMR) - determine the factors affecting.	3 hrs
UNIT-6	Vitamins - Classification - Recommended daily allowance - Dietary sources - Functions - Absorption, synthesis, metabolism, storage and excretion - Deficiencies - Hypervitaminosis	4 hrs
UNIT-7	Minerals - Classification - Recommended daily allowance - Dietary sources - Functions - Absorption, synthesis, metabolism, storage and excretion - Deficiencies - Over consumption and toxicity	4 hrs
UNIT-8	 Water and Electrolyte balance Water – Daily requirements, regulation of water, metabolism, distribution of body water. Electrolytes: Types, sources, composition of body fluids Maintenance of fluid & electrolyte Over hydration, dehydration and water intoxication Electrolyte imbalances. 	3 hrs

UNIT-9	Cookery rules and preservation of Nutrients	5 hrs
	- Principles, methods of cooking and serving	
	- Preservations of nutrients.	
	- safe food handling toxicity	
	- Storage of food.	
	-Food preservation, food additives and its principles	
	- Preservation of food adulteration act (PFA)	
	- Food standards	
	-Preparation of simple beverages of different types of food.	
UNIT-10	Balanced diet	5 hrs
UN11-10	- Elements	3 1118
	- Food groups	
	- Recommended daily allowance	
	- Nutritive value of food	
	- Calculation of balanced diet for different categories of	
	people.	
	- Planning menu	
	- Budgeting of food	
	- Introduction to therapeutic diets, naturopathy – diet-	
UNIT-11	Role of nurse in nutritional programme	10 hrs
	- National programme related to nutrition	
	- Vitamin A deficiency programme	
	- National Iodine deficiency disorders. (IDD) programme.	
	- Mid –day meal programme	
	 Integrated child development scheme 	
	- National & International agencies working towards food /	
	nutrition.	
	- NIPCCD,CARE,FAO, NIN, CFTRI (Central food	
	technology and research institute) etc	
	- Assessment of nutritional status.	
	- Nutrition education and role of nurse.	

BIOCHEMISTRY

Time: Theory 30 hrs

Placement- First Year

Course Description: The course is designed to assist the students to acquire knowledge of the normal biochemical composition and functioning of human body and understand the alteration in biochemistry in disease for practice of nursing.

UNIT	CONTENT	HOURS
UNIT-1	Introduction - Definition and significance in nursing - Review of structure, composition and function of cell Prokaryote and Eukaryote: Cell organization - Microscopy	3 hrs
UNIT-2	Structure and functions of cell membrane - Fluid mosaic model tight junction, cytoskeleton - Transport mechanism: diffusion, osmosis, filtration, active channel, sodium pump - Acid base balance-maintenance and diagnostic tests - PH buffers	6 hrs
UNIT-3	Composition and Metabolism of Carbohydrates - Types, structure, composition and uses. - Monosaccharides, Diasaccharides, Polysaccharides, Ligosaccharides. - Metabolism - Pathways of glucose: - Glycolysis - Glucogenesis: Cori's cycle, Tricarbocyclic acid cycle TCA - Glycogenolysis - Pentose phosphate - Pathways(Hexose mono phosphate) - Regulation of blood glucose level. - Investigation & their interpretation.	6 hrs
UNIT-4	Composition and Metabolism of lipids - Types, structure, composition and uses of fatty acids. - Nomenclature, Roles and prostaglandins. - Metabolism of fatty acids - Breakdown - Synthesis - Metabolism of triglycerols. - Cholesterol metabolism - Biosynthesis and its regulation	6 hrs

	* Bile salts and bilurubin	
	* Vitamin D	
	* Steroid hormones	
	- Lipoproteins and their functions	
	* VLDLs- IDLs and HDLs	
	* Transport of lipids	
	* Arteriosclerosis	
	* Investigations and their interpretation	
UNIT-5	Composition and Matchalian of Amino saids and matcing	6 hrs
UN11-5	Composition and Metabolism of Amino acids and proteins.	omrs
	- Types, structures, composition and uses of amino acids and	
	proteins.	
	- Metabolism of Amino acids and proteins.	
	 Protein synthesis, targeting and glycosylation 	
	- Chemotherapy	
	- Electrophoresis	
	- Sequencing	
	* Metabolism of nitrogen	
	- Fixation & assimilation	
	- Urea cycle	
	- Hemes and chlorophyll	
	* Enzymes and co- enzymes	
	- Classification	
	- Properties	
	- Kinetics & inhibition	
	- Control	
	* Investigations and their interpretation	
	The second secon	
UNIT-6	Composition and Vitamins and Minerals	2 hrs
	- Vitamins and Minerals	
	-Structure	
	- Classification	
	- Properties	
	- Absorption	
	- Storage and transportation	
	- Normal concentration investigations and their interpretation.	1

NURSING FOUNDATION

Placement First year

Theory- 265 hrs Practical -650 hrs (200 labs and 450 clinics)

Course Description: This course is designed to help the students to develop in understanding of the philosophy, objectives, theories and process of nursing in various supervised clinical settings. It is aimed at helping the students to acquire knowledge, understanding and skills in techniques of nursing and practice them in supervised clinical settings.

UNIT	CONTENT	HOURS
UNIT-1 Rajesh	Introduction - Concept of health: Health- Illness continuum - Factors influencing health - Causes and risk factors for developing illness - Body defenses: Immunity and immunization - Illness & illness behavior - Impact of illness on patient and family - Health care services: health promotion and prevention, - Primary care, diagnosis, treatment, rehabilitation and continuing care. - Health care Team - Types of health care agencies - Hospitals: Types, organization and functions - Health promotion and level of disease prevention. - Primary health care and its delivery: Role of nurse	10 hrs
UNIT- 2 Rajesh	Nursing as a profession Definitions and characteristics of a profession. Nursing Definition, concepts, philosophy, objectives. Characteristics, nature, and scope of nursing practice. Functions of Nurse Qualities of nurse. Categories of nursing personnel Nursing as a profession. History of nursing in India. Values: Definition, types, values clarification and values professional nursing caring and advocacy. Ethics: Definition and ethical principles Code of ethics and professional conduct for nurse.	16 hrs

UNIT-3	Hospital admission and discharge	4 hrs
	- Admission to the hospital	
	- Unit and its preparation admission bed	
	- Admission procedure	
	- Special considerations	
	- Medico legal issues.	
	- Roles and responsibilities of nurse.	
	Discharge from the hospital	
	- Types Planned discharge, LAMMA and abscond,	
	- Referrals and transfer.	
	- Discharge planning	
	- Discharge procedure	
	- Special considerations	
	- Medico legal issues	
	- Roles and responsibilities of the nurse.	
	- Care of the unit after discharge.	
	- Care of the unit after discharge.	
UNIT-4	Communication and the nurse patient relationship	10 hrs.
01111-7	- Communication : Levels, elements, types, modes, process,	10 111 5.
	- factors influencing communication	
	- Methods of effective communication	
	# attending skills	
	# Rapport building skills	
	# Empathy skills	
	-Barriers to effective communication	
	- helping relationship (NPR) Dimensions of helping relationships, phases	
	of a helping relationship.	
	Communicating effectively with patient, families and team members and	
	maintain effective human relation with special reference to	
	communicating with vulnerable group(children, women, physically and	
	mentally challenged and elderly)	
	- Patient teaching Importance purpose, process, role of nurse and	
	integrating teaching in nursing process.	
	integrating teaching in nursing process.	
UNIT-5	The Nursing Process	15 hrs
Rajesh	- Critical thinking and nursing adjustment.	
3	 Critical thinking, thinking and learning 	
	- Competencies, attitude for critical thinking, levels of critical	
	thinking in nursing	
	- Nursing process overview	
	- Application in practice	
	- Application in practice

	W '.' 1	
	- Writing nursing care plan	
	- Implementation.	
	- Implementing plan of care	
	- Evaluation	
	- Outcome of care	
	- Review and modify	
	- Documentation and reporting	
UNIT-6	Documentation and reporting	
	- Documentation: purpose of recording and reporting	
	- Communication within the health care team.	
	- Types of record: ward record, medical/ nursing records	4 hrs
	- Guidelines for reporting, factual basis, accuracy, completeness,	
	currentness, organization, confidentiality	
	- Methods of recording	
	- Reporting: change of shift reports: transfer reports, incident	
	reports	
LINUTE 7	Minimizing legal liability through effective record keeping.	151
UNIT-7	Vital signs	15 hrs
Rajesh	Guidelines for taking vital signs	
	Body temperature	
	- Physiology, regulation, factors affecting body temperature	
	- Assessment of body temperature, sites, equipments and	
	technique,	
	- Special considerations	
	- Temperature alterations Hyperthermia, heatstroke, hypothermia	
	 Hot and cold applications. 	
	• Pulse	
	Physiology and regulation, characteristics of pulse, factors	
	affecting pulse	
	- Assessment of pulse: sites, location equipment and technique	
	- special consideration	
	- Alteration in pulse	
	 Respiration 	
	 Physiology and regulation mechanics of breathing 	
	- Characteristics of the respiration factor affecting respiration	
	- Assessment of respiration: technique, special considerations	
	- Alteration in respiration.	
	Blood Pressure	
	- Physiology and regulation, characteristics of blood pressure,	
	factors affecting blood pressure	
	- Assessment of blood pressure : technique, special considerations	
	- Alteration in blood pressure	
	- Reading of vital signs	
UNIT-8	Health Assessment	30 hrs
	- Purpose	
	- Process of health assessment	
	- Health history	
	- Physical examination	

_		,
	- Methods- inspection, palpation, percussion, ausculatation,	
	olfaction	
	- Preparation of examination : patient and unit	
	- General assessment	
	- Assessment of each body system	
	- Recording of health assessment.	
		5 hrs
UNIT-9	Machinery, Equipment and Linen	
	• Type: Disposable and reusable – linen rubber goods, glass ware,	
	metals, plastics, furniture, machinery	
	Introduction	
	- Indent	
	- Maintenance	
	- Inventory	
TINITE 10	Mark and In Calmark at	(0.1
UNIT-10	Meeting needs of the patient.	60 hrs
	Basic needs (Activity of daily living)	
	- Providing safe and clean environment.	
	# Physical – environment, environment, temperature, humidity,	
	noise, ventilation, light, odour, pest control.	
	-Reduction of physical hazards fire accidents	
	Cafaty davisage mantraints, aida maila, aimyeava, tramaga ata	
	Safety devices: restraints, side rails, airways, trapeze etc Role of nurse in providing safe and clean environment.	
	- Role of nurse in providing safe and clean environment.	
	Hygiene	
	- Factors influencing hygiene practices	
	- Hygienic care: Care of the skin- bath and pressure points feet and	
	nail, oral cavity, hair care, eyes, ear and nose.	
	- # Assessment, principles, types equipments, procedure, special	
	considerations	
	- Patient environment: Room equipment and linen, making patient	
	beds.	
	- # Types of beds and bed making	
	- Comfort	
	- Factors influencing comfort	
	- Comfort devices.	
	Physiological needs:	
	- Sleep and rest	
	- Physiology of sleep	
	- Factors affecting sleep	
	- Promoting rest and sleep	
	- Sleep disorders	
	- Nutrition	
	# Importance	
	# Factors affecting nutritional needs	
	# Assessment of nutritional needs, variables.	
	# Meeting nutritional needs: principles, equipments, procedure	
	and special considerations	
	• Oral	
	• Entral: Nasogastric, gastrostomy	

Parenteral

• Urinary elimination

- Review of physiology of urine elimination,
- compositions and characteristics of urine
- Factors affecting urination
- Alteration in urinary elimination
- Types & collection of urine specimens: observation, urine testing
- Facilitating urine elimination assessment, types, equipments, special considerations
- Providing urinal & bedpan
- Condom drainage
- Perineal care
- Cathertization
- Care of urinary drainage
- Care of urinary diversion
- Bladder irrigation
- Bowel elimination
- Review and physiology of bowel elimination
- compositions and characteristics of faeces
- Factors affecting bowel elimination
- Alteration in bowel elimination
- Facilitating bowel elimination assessment, types, equipments, special considerations
- # Passing of flatus tube
- # Enemas
- # Suppositories
- # Seitz bath
- # Bowel wash
- # Care of ostomies

• Mobility and immobility

- Principles of body mechanics
- Maintenance of normal body alignment and mobility
- Factors affecting body alignment and mobility
- # Hazards associated with immobility
- Alteration in body alignment and mobility
- Nursing interventions for impaired body alignment and mobility: Types, devices used, method and special consideration, rehabilitation aspects.
- # Range of motion exercises
- # Maintaining body alignment : positions
- # Moving
- # Lifting
- # Transferring
- # Restraints

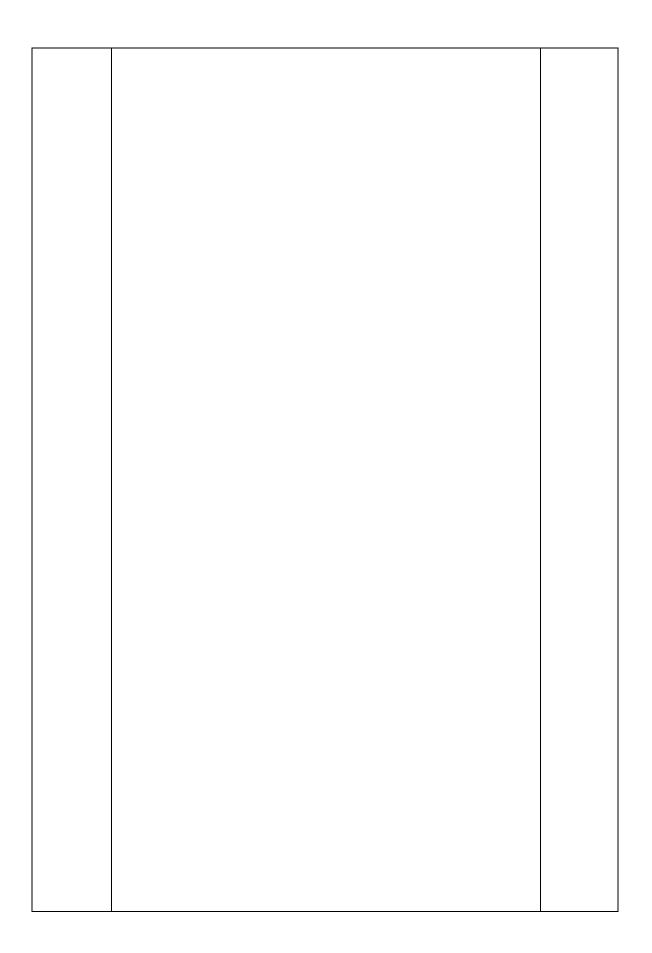

• Oxygenation Rajesh

- Review of cardiovascular and respiratory physiology
- Factors affecting oxygenation
- Alteration in oxygenation
- Nursing intervention in oxygenation: assessment, types, equipments used, procedures and special considerations.
- # Maintenance of patent airway
- # Oxygen administration
- # Suction

- # Inhalation : Dry & moist
- # Chest physiotherapy and postural drainage
- # Pulse oxymetry
- # CPR- Basic life support
- Fluid, electrolyte and acid base balance
 - -Review of physiological regulation of fluid
 - -Electrolyte and acid base balances
- Nursing intervention in Fluid, electrolyte and acid base balance
- : Assessment, types, equipments used procedures and special considerations.
 - -# Measuring fluid intake and output
 - # Correcting fluid & electrolyte balance
 - Replacement of fluids: oral & Parenteral
 - Venipuncture, regulating IV, flow rates, changing IV
 - Solutions & Tubing's, changing IV dressing.
 - Administrating blood transfusion.
 - Restrictions of fluids

Psychological needs

- Concepts of cultural diversity, stress & adaptations, self concept, sexuality, spiritual health. Coping with loss, death & grieving
- Assessment of psychological needs
- Nursing intervention for psychological needs
- Assist with coping and adaptations
- Creating therapeutic environment
- Recreational & diversional therapies.

UNIT 11	Infection control and clinical settings.	20 hrs
	- Nature of infection	
	Nature of infectionChain of infection transmission	
	- Defenses against infection : natural & acquired	
	- Hospital acquired infection	
	- Concept of asepsis : medical asepsis and surgical asepsis	
	- Isolation precaution (barrier nursing)	
	- # Hand washing: simple hand asepsis and surgical asepsis	
	(scrub)	
	- # isolation : source and protective	
	- # Personal protecting equipments: types, uses and techniques of	
	wearing and removing	
	- # Decontamination of equipments and unit	
	- # Transportation of infected patients	
	- # Transmission based precautions.	
	 Biomedical waste management 	
	- Importance	
	- Types of hospital waste	
	- Hazards associated with hospital waste.	
	- Decontamination of hospital waste	
	- Segregation transportation and disposal	
UNIT-12	Administration of Medication	40 hrs
	General principles/ considerations	
	- Purposes of medications	
	- Principle: 5 rights, special considerations, prescriptions, safety in	
	administering in medication	
	- Drug forms	
	Route of administrationStorage & maintenance of drug and nurses responsibility	
	- Storage & maintenance of drug and nurses responsibility - Broad classification of drugs	
	- Therapeutic effect, side effect, toxic effects, idiosyncratic	
	reaction, allergic reaction, drug reaction	
	- Factors influencing drug action	
	- Systems of drug measurements : metric system, apothecary	
	system, households measurement, solution	
	- Converting measurement units : conversion within one system,	
	conversion between systems, dosage calculations	
	- Terminologies and abbreviations used in prescriptions and	
	medications.	
	 Parenteral 	
	- General principles: decontamination of syringes and needles.	
	- Types of parenteral therapies.	
	- Types of syringes, needles, cannula, and infusion sets	
	- Protection from needle stick injuries: giving medications with	
	safety syringes	
	- Routes of parenteral therapies	
	- # intradermal: Purpose, site, equipments, procedure, special	
	considerations	
	# subcutaneous: Purpose, site, equipments, procedure, special	
	considerations # Intermycoular Purpose site againments precedure special	
	# Intramuscular :Purpose, site, equipments, procedure, special	

	T	T
	considerations	
	# Intravenous: Purpose, site, equipments, procedure, special	
	Considerations.	
	# Intravenous: Purpose, site, equipments, procedure, special	
	Considerations.	
	# Advanced technique: epidural, intrathecal,	
	introsseous,intraperotoneal,	
	Intrapleural, intra-arterial – role of nurse.	
	• Topical administration: Purpose, site, equipments, procedure,	
	special considerations.	
	- Application to skin	
	- Application to mucous	
	- Direct application of liquids- gargle and swabbing the throat	
	# Insertion of drug into body activity: Suppository/ medicated	
	packing in rectum/vagina	
	- # Instillation: ear, eye, nasal, bladder, & rectal.	
	- # Irrigation: ear, eye, nasal, bladder, & rectal.	
	# Spraying nose & throat.	
	• Inhalation : Nasal, oral, endotracheal/ tracheal (steam, oxygen,	
	and medication) purposes, equipments, procedure, special	
	Considerations.	
	- Recording and reporting of medication administered.	
UNIT-13	Meeting needs of pre operative patients.	
		10 hrs
	Definition and concept of pre-operative nursing	
	Preoperative phase	
	- Preparation of patient for surgery	
	Intra operative	
	- Operation theatre set up and environment	
	- Role of nurse	
	Post operative phase	
	- Recovery unit	
	- Post operative room	
	- Post operative care	
	Wounds: types, classification, wound healing process,	
	Factors affecting wound, complication of wound healing.	
	Surgical asepsis	
	 Care of wounds: types, equipments, procedure and special 	
	considerations	
	- Dressing, suture care,	
	- Care of drainage	
	- Application of bandages, binders, splints, and slings	
	- Heat & cold therapy	
UNIT- 14	Meeting special needs of the patient	15 hrs
·	Care of patient having alteration in	
	- Temperature (hyper & hypothermia): Types, assessment,	
	management	
	- Sensorium (Unconsciousness), Assessment and management.	
	- Urinary elimination (retention & incontinence) Assessment and	
	management.	
	management.	L

	 Functioning of sensory organs (visual & hearing impairment) Assessment and management. Communication method and special consideration Mobility (physically challenged, cast) Assessment and management. Mental state (mentally challenged) Assessment and management. Communication methods & special considerations 	
	 Respiration (distress), Types, assessment, management Comfort – (pain) nature, types, factors influencing pain, coping Assessment and management. 	
	Treatment related to gastrointestinal system, Nasogastric suction, gastric Irrigation, gastric analysis.	
UNIT- 15	 Care of terminally ill patient Concepts of loss, grief, grieving process Signs of clinical death Care of dying patient, special considerations, Advanced directives, euthanasia, will, dying, declaration, organ donation etc Medico legal issue Care of dead care Equipment, procedure, and care of unit. Autopsy Embalming 	5 hrs
UNIT-16	 Professional Nursing concepts and practices Conceptual and theoretical models of nursing practice: Introduction to models-Holistic model, health belief model, health Promotion model etc Introduction to theories in nursing: Peplau's, Henderson, Orem's, Neumann's , Roger's, and Roy's Linking theories with nursing process. 	6 hrs

NURSING FOUNDATION PRACTICAL

Placement First year

Practical -650 hrs (200 labs and 450 clinics)

Course Description: This course is designed to help the students to develop in understanding of the philosophy, objectives, theories and process of nursing in various supervised clinical settings. It is aimed at helping the students to acquire knowledge, understanding and skills in techniques of nursing and practice them in supervised clinical settings.

UNIT	CONTENT	HOURS
UNIT-1	Hospital admission and discharge (III)	200 450 min
	Admission.	practice
	Prepare unit for new patient.	time
	Prepare admission procedure	clinical
	- New patient	area.
	- Transfer in	
	Prepare patient record	
	Discharge / Transfer out	
	Gives discharge counseling	
	 Perform discharge procedure(planned discharge, LAMMA and 	
	abscond, referrals and transfers)	
	Prepare records of discharge / transfer	
	Dismantle and disinfect unit and equipment after discharge / transfer	
	Perform assessment	
	History taking, nursing diagnosis, problem list, prioritization, goals	
	& outcome selection of interventions.	
	Write nursing care plan.	
	Give s care as per the plan.	
	Communication	
	Use verbal and non verbal communication techniques	
	Prepare a plan for patient teaching session	

Write patient report

- Change of shift reports, transfer reports, incident report etc
- Present patient report

Vital signs

• Measure, record, and interpret alteration in body temperature, pulse, respiration and blood pressure.

Health assessment

- Health history taking
- Perform assessment
- General
- Body systems
- Use various methods of physical examinations
- Inspection, palpation, Percussion, Auscultation, Olfaction.
- Identification of system wise deviations.

Prepare patients unit

- Prepare beds:
- Open, closed, occupied, operation, amputation.
- Cardiac, fracture, burn, and fowler's bed
- Pain assessment and provision for comfort.

Use comfort devices

Hygienic care:

- Oral hygiene
- Bath and care of pressure points
- Hair wash, pediculosis treatment,

Feeding

Naso- gastric insertion, suction and irrigation

Assisting patient in urinary elimination

- Provides urinal / bed pan
- Condom drainage
- Perineal care
- Catheterization care
- Care of urinary drainage

Bladder irrigation

Assisting bowel elimination

- Insertion of flatus tube
- Enemas
- Insertion of suppository

Bowel wash

Body alignment and mobility:

- Range of motion exercises
- Positioning: Recumbent, lateral, fowlers, Sims, lithotomy, prone, trendelburg position.
- Assist patient in moving, lifting, transferring, walking
- Restraints.

Oxygen administration

Suctioning:oropharyngeal, nasopharyngeal

Chest physiotherapy

CPR-basic life support

Intravenous therapy

Blood and blood components therapy

Collect/ assist for collection of specimen for investigations, urine, sputum, faeces, vomitus, blood and other body fluids.

Perform lab tests

- Urine: sugar, albumin and acetone
- Blood: sugar (with stripe/glucometer)

Hot and cold applications: Local and general sitz bath.

Communicating and assisting self care of visually and hearing impaired patient's Communicating and assisting self care of mentally challenged / disturbed patient's

Recreational and diversional therapies.

Caring of patients with alteration in sensation

Infection control

- Perform following procedures
- Hand washing techniques
- (simple, hand antisepsis, and surgical antisepsis)
- Prepare isolation unit in lab / ward
- Practice technique of wearing and removing personal protective equipments.
- Practice standard safety precaution(Universal precautions)
- Documentation of equipment and unit:-
- Surgical asepsis
- # sterilization
- # handling sterilization equipments
- # Calculate strengths of lotions
- # Prepare lotions
- Care of articles.

Pre and post operative care

- Skin preparation for surgery: local
- Preparation of post operative unit
- Pre and post operative unit
- Pre & post operative teaching and counseling
- Pre and post operative monitoring
- Care of wound
- Dressing: suture care, care of drainage, application of bandage, binders, splint and slings.
- Bandaging of various body parts.

Administration of medications

- Administer medication in different forms and routes
- Oral, sublingual and buccal
- Parenteral: intradermal, subcutaneous, intramuscular etc
- Assist with intravenous medication
- Drug measurement and dose calculation
- Preparation of lotions and solutions.
- Administer topical applications.
- Insertion of drug into body cavity: suppository & medicated packing
- Instillation of medicine and spray into ear, eye, nose and throat.
- Irrigation: eye, ear, bladder, vagina and rectum
- Inhalation : dry and moist

Care of dving patient

 Caring and packing of dead body Counseling and supportive grieving relatives Terminal care of unit 	
--	--

PSYCHOLOGY

Placement: First year Theory -60 hrs

Course Description: This course is designed to help the students to acquire knowledge of fundamentals of psychology and develop an insight in behavior of self and others. Further it is aimed at helping them to practice the principles and mental hygiene for promoting mental health in nursing practice.

UNIT	CONTENT	HOURS
UNIT-1	Introduction	2 hrs

	History and origin of science of psychology	
	Definition & scope of psychology	
	Relevance to nursing	
	Methods of psychology	
	F J S S S	
UNIT-2	Biology of behavior	4 hrs
C1,111 =	Body mind relationship- modulation process in health and illness	
	Genetics and behavior – heredity and environment	
	Brain and behavior- nervous system, neurons and synapse	
	Association cortex, Rt and Lt hemisphere	
	Psychology of sensation	
	,	
	Muscular and glandular controls of behavior	
	Nature of behavior of an organism/ Integrated responses	
UNIT-3	Cognitive process	20 hrs
	Attention: types, determinants, duration and degree alteration.	
	 Perception: meaning, principles, factors affecting, errors 	
	• Learning: Nature, types, learner and learning, factors influencing.	
	Laws and theories, process, transfer, study habits	
	Memory: Meaning, types, nature, factors influencing development	
	theories and methods of memorizing and forgetting	
	Thinking: types and levels, stages of development, relationship with	
	language and communication.	
	Intelligence: Meaning, classification, uses, theories	
	Attitude: concept, types, and levels, stages of development	
	Psychometric assessment of cognitive processes	
	Alteration in cognitive processes	
	Application.	
UNIT-4	Motivation and Emotion process	8 hrs
	Motivation: Meaning, concept, types, theories, motives and behavior,	
	conflicts and frustration conflict and resolution	
	Emotion and stress	
	- Emotion: Definition, components, change in emotions	
	Emotion: Definition, components, change in emotionsTheories, emotions in health and illness.	
	 Emotion: Definition, components, change in emotions Theories, emotions in health and illness. Stress: stressors, cycle, affect, adaptation and coping 	
	 Emotion: Definition, components, change in emotions Theories, emotions in health and illness. Stress: stressors, cycle, affect, adaptation and coping Attitude: meaning, nature, development, factors affecting 	
	 Emotion: Definition, components, change in emotions Theories, emotions in health and illness. Stress: stressors, cycle, affect, adaptation and coping Attitude: meaning, nature, development, factors affecting Behavior and attitude 	
	 Emotion: Definition, components, change in emotions Theories, emotions in health and illness. Stress: stressors, cycle, affect, adaptation and coping Attitude: meaning, nature, development, factors affecting Behavior and attitude Attitudinal changes 	
	 Emotion: Definition, components, change in emotions Theories, emotions in health and illness. Stress: stressors, cycle, affect, adaptation and coping Attitude: meaning, nature, development, factors affecting Behavior and attitude Attitudinal changes Psychometric assessment of emotions and attitudes 	
	 Emotion: Definition, components, change in emotions Theories, emotions in health and illness. Stress: stressors, cycle, affect, adaptation and coping Attitude: meaning, nature, development, factors affecting Behavior and attitude Attitudinal changes Psychometric assessment of emotions and attitudes Alteration in emotion 	
	 Emotion: Definition, components, change in emotions Theories, emotions in health and illness. Stress: stressors, cycle, affect, adaptation and coping Attitude: meaning, nature, development, factors affecting Behavior and attitude Attitudinal changes Psychometric assessment of emotions and attitudes 	
UNIT-5	 Emotion: Definition, components, change in emotions Theories, emotions in health and illness. Stress: stressors, cycle, affect, adaptation and coping Attitude: meaning, nature, development, factors affecting Behavior and attitude Attitudinal changes Psychometric assessment of emotions and attitudes Alteration in emotion Application 	7 hrs
UNIT-5	 Emotion: Definition, components, change in emotions Theories, emotions in health and illness. Stress: stressors, cycle, affect, adaptation and coping Attitude: meaning, nature, development, factors affecting Behavior and attitude Attitudinal changes Psychometric assessment of emotions and attitudes Alteration in emotion Application Personality	7 hrs
UNIT-5	 Emotion: Definition, components, change in emotions Theories, emotions in health and illness. Stress: stressors, cycle, affect, adaptation and coping Attitude: meaning, nature, development, factors affecting Behavior and attitude Attitudinal changes Psychometric assessment of emotions and attitudes Alteration in emotion Application Personality Definition, topography, types, theories 	7 hrs
UNIT-5	 Emotion: Definition, components, change in emotions Theories, emotions in health and illness. Stress: stressors, cycle, affect, adaptation and coping Attitude: meaning, nature, development, factors affecting Behavior and attitude Attitudinal changes Psychometric assessment of emotions and attitudes Alteration in emotion Application Personality Definition, topography, types, theories Psychometric assessment of personality 	7 hrs
UNIT-5	 Emotion: Definition, components, change in emotions Theories, emotions in health and illness. Stress: stressors, cycle, affect, adaptation and coping Attitude: meaning, nature, development, factors affecting Behavior and attitude Attitudinal changes Psychometric assessment of emotions and attitudes Alteration in emotion Application Personality Definition, topography, types, theories Psychometric assessment of personality Alteration in personality 	7 hrs
UNIT-5	 Emotion: Definition, components, change in emotions Theories, emotions in health and illness. Stress: stressors, cycle, affect, adaptation and coping Attitude: meaning, nature, development, factors affecting Behavior and attitude Attitudinal changes Psychometric assessment of emotions and attitudes Alteration in emotion Application Personality Definition, topography, types, theories Psychometric assessment of personality 	7 hrs
UNIT-5 UNIT-6	 Emotion: Definition, components, change in emotions Theories, emotions in health and illness. Stress: stressors, cycle, affect, adaptation and coping Attitude: meaning, nature, development, factors affecting Behavior and attitude Attitudinal changes Psychometric assessment of emotions and attitudes Alteration in emotion Application Personality Definition, topography, types, theories Psychometric assessment of personality Alteration in personality 	7 hrs

	Psychology of vulnerable individual- challenged, women sick.	
	Psychology of groups	
UNIT-7	 Mental Hygiene and Mental Health Concept of mental hygiene and mental health Characteristics of mentally healthy person Warning signs of poor mental health Promotive and preventive mental health - Strategies and services. Ego defense mechanisms and implication Personal and social adjustment Guidance and counseling Role of nurse 	8 hrs
UNIT-8	Psychological assessments and tests Types, development, characteristics, principles, uses, interpretation and role of nurse in psychological assessment	4 hrs

INTRODUCTION TO COMPUTERS

PLACEMENT: FIRST YEAR THEORY-45 HRS

Course Description: This course is designed for students to develop basic understanding of uses of computers and its application in nursing.

UNIT	CONTENT	HOUR	S	
		Th	Pr	l

UNIT-1	Introduction	3	
	 Concepts of computers 		
	 Hardware and software: trends and technology 		
	Application of computer in nursing		
	Introduction to disk operating system	6	20
UNIT-2	- DOS		
	- Windows(All versions)		
	Introduction		
	- MS- Word		
	- MS -Excel with pictorial presentation		
	- MS-Access		
	- MS- Power point		
		2	3
UNIT-3	Multimedia: types and uses		
	Computer aided teaching and testing		
	Use of internet : email	1	3
UNIT-4			
		2	2
UNIT-5	Statistical Package: types and their features		
UNIT-6	Hospital management system: types and uses	1	2

B.Sc. NURSING SECOND YEAR

SOCIOLOGY

PLACEMENT: SECOND YEAR THEORY – 60 HRS

Course Description: This course is designed to introduce the concept of sociology related to community and social institutions in India and its relationship with health, illness and nursing.

UNIT	CONTENT	HOURS
C 1 1 1 1	001(121(1	220022

UNIT-1	 Introduction Definition of sociology Nature and scope of discipline Importance and application of sociology in nursing 	1 hr
UNIT-2	Individual and society	3 hrs
UNIT-3	Culture Nature of culture Evolution of culture Diversity and uniformity of culture Culture and socialization Trans cultural society Influence on health and disease	3 hrs
UNIT-4	Social groups and processes The meaning and classification of groups Primary and secondary group In-group V/s output, class,tribe,caste Economic, political, religious groups, mob, crowd, public, and audience interaction and social processes Accommodation, assimilation, and isolation	4 hrs
UNIT-5	Population	6 hrs
UNIT-6	Family and marriage • Family – functions • Types- joint, nuclear, blended and extended • Family: characteristics • The modern family – changes, problems-dowry etc Welfare services • Changes and legislation on family and marriage in India-Marriage acts • Marriage: forms and functions of marriage • Marriage and family problems in India • Family, marriage and their influence on health and health practice	5 hrs
UNIT-7	Social Stratification	7 hrs

		T
	 Meaning and types of social stratification The Indian caste system – origin and feature 	
	Features of caste in India today	
	Social class system and status	
	 Social mobility- Meaning and types 	
	Race as a biological concept, criteria of racial classification	
	Salient feature of primary races-racism	
	Influence of class, caste, and race on health and health	
	practices.	
	r	
UNIT-8	Types of communication in India (rural, urban regional)	6 hrs
	Features of village community and characteristics of Indian	
	villages – Panchayat system, social dynamics	
	Community development project and planning	
	Changes in Indian urban life	
	Availability of health facilities in rural and its impact on	
	health and health practice	
	Urban – community – features The ground of sixting and sixting and its impact health and	
	The growth of cities urbanization and its impact health and health practice	
	Major urban problems- urban slums	
	Region : problems and impact on health	
	Tregion i proorente una impaev on neumi	
UNIT-9	Social change	4 hrs
	 Nature and process of social change 	
	Factors influencing social change: cultural change, cultural	
	lag	
	 Introduction to theories of social 	
	change:linear,cyclical,Marxi	
	Functional	
	Role of nurse – change agents	
UNIT-10	Social Organization and social change	4 hrs
01/11/10	Social Organization: elements, types	
	Democratic and authoritian modes of participation	
	Voluntary associations	
	Social system: definition, and types of social system	
	Inter-relationship of institutions.	
	-	
LINUT 11	Secial Control	2 1
UNIT-11	Social ControlNature and process of social control	2 hrs
	 Nature and process of social control Political, legal, religion, educational, economic, industrial 	
	and technological systems, norms and values- Folkways & mores,	
	customs, laws and fashion	
	Role of nurse	
		45.
UNIT- 12	Social problems	15 hrs
	Social disorganization	
	 Control and planning: poverty, housing, illiteracy, food 	

supplies, prostitution, rights of women and children	
Vulnerable groups: elderly, handicapped, minority groups and	
marginalized groups, child labor, substance abuser, HIV / AIDS.	
Social welfare programme in India	
Role of nurse	

PHARMACOLOGY

PLACEMENT: Second year Theory: 45 hrs

Course Description: This course is designed to enable students to acquire understanding of pharmaco-dynamics, pharmacokinetic, principles and therapeutic and nursing implication.

UNIT	CONTENT	HOURS
UNIT-1	Introduction to pharmacology Definition Sources Terminology used Types: Classification Pharmacodynamics: Action, therapeutic Adverse toxic Pharmacokinetic: absorption, interaction, excretion Review: routes and principles of administration of drugs Indian pharmacopoeia: legal issue Rational use of drugs Principles of therapeutics	3 hrs
UNIT-2	Chemotherapy Pharmacology of commonly used: Penicillin Sources Cephalosporin Amino glycosides Macrolide and broad spectrum antibiotics Sulfonamides Quinolones Antiamalaria Antihelementics Antiscabies agents Antiviral and antifungal agents Antitubercular drugs Anticancer drugs Immunosuppressants Composition: action, dosage, route, indications, contraindication, drug interaction, side effects, adverse effects, toxicity and role of nurse.	6 hrs
UNIT-3	Pharmacology of commonly used antiseptics, disinfectants, and insecticides Antiseptics: Composition: action, dosage, route, indications, contraindication, drug interaction, side effects, adverse effects, toxicity and role of nurse.	2 hrs

	Disinfectants	
	Insecticides	
	insecticides	
UNIT-4	Drugs acting on GI system	
UN11-4	Pharmacology of commonly used	2 hrs
	- Antiemtics	2 111 8
	- Emetics	
	- Purgatives	
	- Antacids	
	- Cholinergic	
	- Anticholinergic	
	- Fluid and electrolyte therapy	
	- Anti diarrheal's	
	- Histamines	
	Composition: action, dosage, route, indications, contraindication, drug	
	interaction, side effects, adverse effects, toxicity and role of nurse.	
TINITE 5		2.1
UNIT-5	Drugs acting on respiratory system	2 hrs
	Pharmacology of commonly used	
	- Antiasthematics	
	- Mucolytics	
	- Decongestants	
	- Expectorants	
	- Antitussives	
	- Bronchodilators	
	- Antihistamines	
	Composition: action, dosage, route, indications, contraindication, drug	
	interaction, side effects, adverse effects, toxicity and role of nurse.	21
UNIT-6	Drugs acting in uninary system	2 hrs
UN11-0	Drugs acting in urinary system	
	 Pharmacology of commonly used Diuretics and anti diuretics 	
	- Urinary antiseptics	
	- Cholinergic and Anticholinergic	
	- Acidifiers and alkalinizers	
	Composition: action, dosage, route, indications, contraindication, drug	
	interaction, side effects, adverse effects, toxicity and role of nurse.	
	interaction, side effects, adverse effects, toxicity and fole of fidise.	
UNIT-7	Miscellaneous	4 hrs
01111-7	Drugs used in deaddiction	7 111 5
	Drugs used in CPR and emergency Witaming and minerals immune suppressent	
	Vitamins and minerals immunosuppressant	
	• Antidotes	
	Vaccines and sera	
UNIT-8	Drugs used on skin and mucus membranes	1 hr
	 Topical application for skin, eye, ear, nose and buccal cavity 	
	 Antiprurities 	
	Composition: action, dosage, route, indications, contraindication, drug	
	interaction, side effects, adverse effects, toxicity and role of nurse	

UNIT-9	Drugs acting on nervous system	8 hrs
	Basic applied pharmacology of commonly used	
	Analgesics and anesthetics	
	- Analgesics	
	# Non steroidal anti inflammatory drug (NSAID)	
	- Antipyretics	
	- Hypnotics and sedatives	
	# Opiods	
	# non opiods	
	# Tranquilizers	
	# General and local anesthetics	
	# Gases : oxygen, nitrous oxide, carbon di oxide	
	Cholinergic and Anticholinergic	
	- Muscle relaxants	
	- Major tranquilizers	
	- Antipsychotic	
	- Antidepressant	
	- Anticonvulsant	
	- Adrenergics	
	- Nonadrenergics	
	 Mood stabilizers Acetylcholine 	
	- Stimulants	
	Composition: action, dosage, route, indications, contraindication, drug	
	interaction, side effects, adverse effects, toxicity and role of nurse.	
UNIT-10	Cardiovascular drugs	5 hrs
01111 10	Hematinics	
	• Cardiotonics	
	Anti anginals	
	Anti hypertensive and vasodilators	
	Anti – arrhythmic	
	Plasma expenders	
	-	
	Coagulants & anticoagulants Anticletal standard and through a lating	
	Antiplatelets and thrombolytics	
	Hypolipidemics	
	Composition: action, dosage, route, indications, contraindication, drug	
	interaction, side effects, adverse effects, toxicity and role of nurse.	
UNIT-11	Drugs used for hormonal disorders and supplements, contraception and	4 hrs
	medical termination of pregnancy	
	Insulin and oral hypoglycemic	
	Thyroid supplement and suppressants	
	Steroids, antibiotics	
	Uterine stimulants and relaxants	
	Oral contraceptives	
	Other estrogen – progesterone preparation	
	Corticotrophin & gonadotropines	
	Corticotrophin & gonadotrophies Adrenaline	
	Prostaglandins Calaitening	
	• Calcitonins	
	Calcium salts	1

	Calcium regulators Composition: action, dosage, route, indications, contraindication, drug interaction, side effects, adverse effects, toxicity and role of nurse.	
UNIT- 12	Introduction to drug used in alternative system of medicine * Ayurveda, Homeopathy, Unani and Sidha etc	6 hrs

PATHLOGY AND GENETICS

SECTION-A – PATHALOGY

PLACEMENT: Second year Time: Theory 30 hours

Course Description: This course is designed to enable students to acquire knowledge of pathology of various disease conditions and apply this knowledge in practice of nursing.

UNIT	CONTENT	TIM (HR	
UNIT-1	INTRODUCTION Importance of study of pathology Definition of terms Methods of technique Cellular and tissue changes Infiltration and regeneration Inflation and infection Wound healing Vascular changes Cellular growth, Neoplasm's Normal and cancer cell Benign and malignant growth In situ carcinoma Disturbances in fluid and electrolyte imbalance	Th 3	Pr
UNIT-2	 SPECIAL PATHOLOGY Pathological changes in disease conditions o0f various systems Respiratory tract Tuberculosis, Bronchitis, Pleural effusion and Pneumonia Lung abscess, Emphysema, Bronchietcasis, Bronchial asthma, Chronic obstructive pulmonary disease & tumors Cardio- vascular system Pericardial effusion 	10	5

			1
	Rheumatic heart disease		
	 Infective endocarditis, atherosclerosis 		
	 Ischemia, infarction & aneurysm 		
	Gastro Intestinal Tract		
	 Peptic ulcer, typhoid 		
	 Carcinoma of GI tract- buccal, esophageal 		
	Gastric and intestinal		
	Liver Gall bladder & pancreas		
	 Hepatitis, Chronic liver abscess, cirrhosis 		
	 Tumors of liver gall bladder and pancreas 		
	 Cholecystitis 		
	Kidneys and Urinary tract		
	Glumerulonephritis, pyelonephritis		
	Calculi, renal failure, renal carcinoma & cystitis.		
	Male genital systems		
	Cryptochidism, testicular atrophy		
	Prostatic hyperplasia, carcinoma penis & prostrate.		
	Female genital system		
	Fibroids		
	Carcinoma cervix and endometrium		
	Vesicular mole, choriocarcinoma		
	Etopic gestation		
	Ovarian cyst & tumors		
	Cancer breast		
	Central nervous systemHydrocephalus, Meningitis, Encephalitis		
	Vascular disorders- thrombosis, embolism		
	Stroke, paraplegia, quadriplegia		
	Tumors, meningiomas- gliomas		
	Metastatic tumor		
	Skeletal system		
	Bone healing, osteoporosis, osteomyletis		
	Arthritis & tumors.		
UNIT-3	CLINICAL PATHOLOGY	4	3
01411-3	Various blood and bone marrow test in assessment and	•	
	monitoring of disease conditions.		
	Hemoglobin		
	RBC, White cells, & platelet counts		
	 Bleeding time, clotting time, and prothrombin time 		
	71		
	Blood chemistry Blood sylving		
	Blood culture		
	Serological and immunological test		
	Other blood test		
	Examination of bone marrow		
	Methods of collection of blood specimen for various clinical		
	Pathology, biochemistry, microbiology tests.		
	 Inference and normal values. 		
i			1

UNIT-4	 Examination of body cavity fluids, transduates and exudates The laboratories tests used in CSF analysis Examination of other body cavity fluids, transduates and Exudates – sputum, wound discharge etc Analysis of gastric and duodenal contents Analysis of semen- sperm count, motility and morphology and their importance in infertility Methods of collection of CSF & other cavity fluids, specimen for various clinical pathology, biochemistry, microbiology tests Inference and normal values. 	2	1
UNIT-5	Urine and faeces # Urine • Physical characteristics • Analysis • Culture and sensitivity # Faeces • Characteristics • Stool examination: occult blood, ova, parasite and cyst Reducing substances etcMethods of collection for various tests, Inference and normal values.	1	1

SECTION-B GENETICS

Placement: Second Year Time Theory-15 hours

Course description: This course is designed to enable students to acquire knowledge of Genetics, its role in causation and management of defects and diseases.

UNIT

		3
UNIT-1	Introduction	
	 Practical application of genetics in Nursing Impact of genetic conditions on families Review of cellular division mitosis and meiosis Characteristics and structure of genes Chromosomes and sex determination Chromosomal aberration patterns of inheritance # Mendalian theory of inheritance # Multiple allots and blood groups # Sex linked inheritance # Errors in transmission (Mutation) 	
UNIT-2	Maternal, prenatal, and genetic influences on development of defects and diseases. Conditions affecting the mother: genetic and infections. Consanguinity atopy Prenatal nutrition and food allergies Maternal age Maternal drug therapy Prenatal testing and diagnosis Effect of radiation, drugs and chemicals Infertility Spontaneous abortion Neural tube defects and role of folic acid in lowering the risk Downs syndrome (Trisomy 21)	3
UNIT-3	Genetic testing in neonates and children • Screening for # congenital abnormalities # Developmental delay # Dysmorphism	2
UNIT-4	Genetic conditions of adolescents and adults	2
UNIT-5	Services related to genetics Genetic testing Human genome project Gene therapy The Eugenics movement Genetic counseling Legal and Ethical issues Role of nurse.	5

Medical Surgical Nursing

(Adult including Geriatrics)-1

Placement: Second Year Time Theory – 210hours
Practical-720hours

Course Description: The purpose of this course is to acquire knowledge and develop proficiency in caring for patients with medical and surgical disorders in varities of health care settings and at home.

UNIT	CONTENT	TIME (HRS)
UNIT-1	INTRODUCTION Introduction to medical surgical nursing-Evolution and trends of medical and surgical nursing. Review of Concepts of health and illness Disease-concepts causations, classification-International Classification Diseases (ICD-10 or later version). Acute illness chronic illness, stages of illness. Review of concepts of comprehensive nursing care in medical surgical conditions based on nursing process. Role of Nurse patient and family in care of adult patient. Role and responsibilities of a nurse in of medical and surgical settings. Outpatient department. In-patient unit. Intensive care unit. Home and Community. Introduction to of Medical and surgical asepsis. Inflammation and infection Immunity. Wound healing. Care of Surgical Patient Pre-operative	15

	o Post-operative	
UNIT-II	Common signs and symptoms and management. • Fluid and electrolyte imbalance • Vomiting • Dyspnea and cough, respiratory obstruction. • Fever • Shock • Unconsciousness, Syncope • Pain	15
	• Incontinence	
	EdemaAge related problems-Geriatric	
UNIT-III	Nursing management of patients (adult including elderly) with respiratory	20
	problems.	
	 Review of anatomy and physiology of respiratory systems. 	
	 Nursing Assessment-History and Physical assessment 	
	• Etiology, Pathophysiology clinical manifestations diagnosis treatment	
	modalities and medical. Surgical dietetics & nursing management of adults	
	including elderly with-	
	 Upper Respiratory tract infections. 	
	o Bronchitis	
	o Asthma	
	o Emphysema	
	o Empyema	
	o Atelectasis	
	o Chronic Obstructive Pulmonary Diseases (COPD)	
	o Bronchietasis	
	o Pneumonia	
	o Pulmonary tuberculosis	
	o Lung abscess	
	o Pleural effusion	
	o Cysts and tumors	
	o Chest injuries	

	Respiratory arrest and insufficiency	
	o Pulmonary embolism	
	Special therapies, alternative therapies	
	Nursing procedures	
	Drugs used in treatment of respiratory disorders	
UNIT IV	 Nursing management of Patients (adults including elderly) with disorders of digestive systems. Review of anatomy and physiology of digestive systems. Nursing Assessment –History and physical assessment. Etiology, Pathophysiology clinical manifestations, diagnosis, treatment modalities and medical, surgical dietetics & nursing management. Disorders of Oral Cavity- lips, gums, tongue, tongue, salivary glands and teeth. Esophagus-inflammation, structure obstruction bleeding and tumors. Stomach and Duodenum- hiatus hernia. Gastritis, peptic ulcer duodenum ulcer bleeding, tumors, pyloric stenosis. Small intestinal disorders- inflammation and infection, enteritis, malabsorption, obstruction, bleeding and tumor and perforation. Large intestinal disorders- Colitis inflammation and infection enteritis obstruction tumor and lump. Hernias Appendix- inflammation, mass, abscess, rupture. Anal & Rectum, hemorrhoids, fissures and fistulas Peritonitis/acute abdomen. Pancreas, inflammation, cyst, abscess and tumor. Liver: inflammation, cyst, abscess, cirrhosis, portal hypertension, hepatic 	30
	failure and tumor. Gall Bladder: inflammation, obstruction, stones and tumor.	
	 Gall Bladder: inflammation, obstruction, stones and tumor. Special therapies, alternative therapies 	
	Nursing procedures	
	Drugs used in treatment of disorders of digestive systems.	
	27450 4504 in treatment of disorders of digestive systems.	
UNIT V	Nursing management of patients (adult including elderly) with blood and cardio vascular problems.	30

- Review of anatomy and physiology of blood and cardio vascular systems.
- Nursing Assessment- History and Physical assessment.
- Etiology, Pathophysiology clinical manifestations, diagnosis treatment modalities and medical surgical dietetics & nursing management of –
- Vascular system.
- o Hypertension, hypotension
- Arteriosclerosis
- o Raynaud's disease
- o Aneurysm and Peripheral vascular disorder

Heart

- Coronary artery diseases
 - Ischemic Heart Disease
 - o Coronary artheriosclerosis.
 - o Angina pectoris
 - o Myocardial infraction.
- Vascular disorders of the heart
 - o Congenital and acquired
 - o Rheumatic Heart diseases

Endocarditis, percarditis Myocarditis

- Cardio Myopathies
- Cardiac dysrhythmias. Heart Block
- Congestive cardiac failure
 - Cor-pulmonale, pulmonary edema, cardiogenic shock cardiac tamponade
- Cardiac emergencies and arrest
- Cardio pulmonary Resuscitation (CPR)
- Blood
 - o Anemia's
 - Polycythemia
 - o Bleeding disorders, clotting factor defects and platelets defects
 - Thalassemia
 - o Leukaemias
 - Leukopenias and agranulocytosis
 - o Lymphomas
 - Myelomas

	o Myelomas	
	Special therapies	
	management of adverse transfusion reaction, record for blood transfusion	
	o Management and counseling of blood donor's phlebotomy	
	procedure and post donation management. Blood bank functioning	
	and hospital transfusion committee Bio-safety and waste	
	management in relation of Blood transfusion.	
	Role of a nurse in organ donation, retrieval and banking	
	Alternative therapies	
	Nursing procedures	
	Drugs used in treatment of blood and cardio vascular disorder.	
Unit VI	Nursing management of patients (adult including elderly) with Gentio-Urinary	10
	problems	10
	Review of anatomy and physiology of Gentio-Urinary systems.	
	Nursing Assessment-History and physical assessment	
	Etiology, Pathophysiology clinical manifestation diagnosis treatment	
	modalities and medical surgical dietetics & nursing management of-	
	Nephritis	
	Nephrotic syndrome	
	Nephrosis	
	Renal calculus The state of the state	
	• Tumors	
	Acute renal failure	
	Chronic renal failure	
	End stage renal disease	
	Dialysis renal transplant	
	Congenital disorders urinary infections	
	Benign prostate hypertrophy	
	Disorders of ureters. Urinary bladder and urethra-inflammation infection	
	structure obstruction tumor prostrate.	
	Special therapies alternative therapies	
	Nursing procedures	

	Drugs used in treatment of disorder of Gentio-Urinary systems	
UNIT VII	Nursing Management of disorders of male (adult including elderly)	5
	Reproductive system.	
	Review of anatomy and physiology of male reproductive system.	
	Nursing Assessment –History and Physical assessment	
	Etiology, Pathophysiology clinical manifestations, diagnosis treatment	
	modalities and medical surgical dietetics & nursing management of male	
	reproductive system.	
	Congenital malformations, cryptorchidism	
	Hypospadiasis, Epispadiasis	
	• Infection	
	Testis and adjacent structures	
	• Penis	
	Prostrate Inflammation infection hypertrophy tumor	
	Sexual dysfunction	
	Infertility	
	Contraception	
	Breast : gynecomastia tumour	
	Climacteric changes – Special theories alternative therapies	
	Nursing procedures	
	Drugs used in treatment of disorders of male reproductive system	
UNIT VIII	Nursing management of Patients (adult including elderly) with disorders of	10
	endocrine systems	
	Review of anatomy and physiology of endocrine systems	
	Nursing Assessment – History and Physical assessment	
	Etiology, Pathophysiology clinical manifestation diagnosis treatment modalities and	
	medical surgical dietetics & nursing management of –	
	Disorders of Thyroid and Parathyroid	
	o Diabetes mellitus	
	o Adrenal tumour	
	o Pituitary disorders	
	Special therapies, alternative therapies	

	Nursing procedures	
	Drugs used in treatment of disorders of endocrine systems	
UNIT IX	Nursing management of Patients (adults including elderly) with disorders of	15
	Integumentary system	
	Review of anatomy and physiology of Integumentary system	
	Nursing Assessment – History and Physical assessment	
	Etiology Pathophysiology clinical manifestations, diagnosis treatment	
	modialities and medical surgical dietetics & nursing management of skin	
	and its appendages –	
	 Lesions and abrasions 	
	o Infection and infestations Dermatitis	
	o Dermatoses: infectious and infectious	
	"Inflammatory Dermatoses"	
	o Acne Vulgaris	
	Allergies and Eczema	
	o Psoriasis	
	o Malignant melanoma	
	o Alopecia	
	Special therapies, alternative therapies	
	Nursing procedures.	
	Drugs used in treatment of disorders of Integumentary systems	
UNIT X	Nursing management of Detients (edult including eldenly) with discusses of	15
UNITA	Nursing management of Patients (adult including elderly) with disorders of musculoskeletal system	13
	Review of anatomy and physiology of musculoskeletal system	
	• Etiology Pathophysiology clinical manifestations diagnosis treatment modalities and medical surgical dietics & nursing management of.	
	Muscles Ligaments and Joints- inflammation, infection trauma.	
	o Bones- inflammation, infection dislocation fracture tumour and	
	trauma	
	Osteomalacia and osteoporosis	
	o Arthritis	
	 Congenital deformities 	

	o Spinal column-defects and deformities, tumour, prolapsed inter	
	vertebral disc, pott's spine	
	o Paget's disease	
	Amputation	
	• Prosthesis	
	Transplant & replacement surgeries	
	Rehabilitation	
	Special therapies alternative therapies	
	Nursing procedures	
	Drugs in treatment of disorders of musculosketal system	
UNIT XI	Nursing management of Patients (adults including elderly) with Immunological system.	10
	Review of Immune system	
	Nursing Assessment History and Physical assessment	
	Etiology: Pathophysiology clinical manifestation diagnosis treatment	
	modalities and medical surgical dietetics & nursing management of –	
	 Immunodeficiency disorder4 	
	 Primary immuno deficiency 	
	 Phagocyric dysfunction 	
	B-cell and T-cell deficiency	
	 Secondary immuno deficiency 	
	Acquired immuno deficiency syndrome (AIDS)	
	o Incidence of HIV & AIDS	
	 Epidemiology 	
	Transmission-Prevention of Transmission	
	 Standard safety precautions 	
	 Role of Nurse Counseling 	
	 Health Education and home care consideration 	
	o National AIDS control program- NACO, various national and	
	international agencies	
	 Infection control program 	
	Rehabilitation	
	Special therapies alternative therapies	
	Nursing procedures	
	Or Stanta	

	Drugs used in treatment of disorders of Immunological systems	
UNIT XII	Nursing management of Patients (adult including elderly) with Communicable Diseases	20
	 Overview of infectious disease the infectious process 	
	Nursing Assessment-History and Physical assessment - Faid-minlager infactions are aliminal assessment	
	• Epidemiology, infectious process, clinical manifestation diagnosis treatment, prevention and dietetics. Control and eradication of common	
	Communicable disease-	
	Tuberculosis	
	 Diarrhoeal disease 	
	Hepatitis A-E	
	Herpes	
	Chickenpox	
	o Small pox	
	o Typhoid	
	Meningitis	
	o Gas gangrene	
	o Leprosy	
	o Dengue	
	o Plague	
	o Malaria	
	o Diphtheria	
	o Pertussis	
	o Poliomyelitis	
	o Measles	
	o Mumps	
	o Influenza	
	o Tetanus	
	o Yellow fever	
	o Filariasis	
	o HIV/AIDS	
	Reproductive infection	
	 Special infection control measures notification, isolation quarantine, immunization, infection disease hospitals 	

	Special therapies alternative therapies	
	Nursing procedures	
	Drugs used in treatment of communicable	
UNIT XIII	Perioperative nursing care	25
	Organization and physical set-up of the operation theatre (OT)	
	 Classification 	
	o O.T DESIGN	
	o Staffing	
	 Members of OT team 	
	 Duties and responsibilities of nurse in O.T 	
	 Principles of health and operating room attire 	
	o Instruments	
	 Suture and sutures material 	
	o Equipments	
	 O.T tables and set for common surgical procedures 	
	 Position and draping for common surgical procedures 	
	 Scrubbing procedures 	
	o Gowning and gloving	
	o Preparation of OT sets Monitoring the patient during surgical	
	procedures	
	Maintenance of therapeutic environment in OT	
	Standard safety measures	
	 Infection control fumigation disinfections and sterilization 	
	o Biomedical waste management	
	 Prevention of accidents and hazards in OT 	
	• Anesthesia	
	o Types	
	 Methods of administration 	
	o Effects and stages	
	o Equipments	
	o Drugs	
	Cardiopulmonary resuscitation (CPR)	
	Pain management techniques	
	o Legal aspects	

MEDICAL SURGICAL NURSING (Adult including Geriatrics)-I

Practical

Placement: Second year TIME: 720 HRS

AREA	SKILLS	DURATION (in weeks)
General Medical Ward (Respiratory, Endocrine, Renal, Hematology)	 Assessment of the patient Taking history Perform general and specific examination Identify alteration and deviation 	6

	 Practice medical surgical asepsis- standard safety measures Administer medication Oral, IV IM Subcutaneous IV therapy IV canulation Maintenance and monitoring Oxygen therapy by different methods Nebulization Chest physiotherapy Naso gastric feeding Assist in common diagnostic Perform/Assist in therapeutic procedures Blood and component therapy Throat suctioning Collect specimen for common investigations Maintain elimination Catheterization, Bowel wash Enema, Urinary drainage Maintain intake output and documentation Counsel and teach related to specific disease conditions 	
General Surgical Ward (GI, Urinary, CTVS)	 Practice medical surgical asepsis Standard safety measures Pre-operative preparation of the patients Post operative care- Receiving patient, assessment Monitoring care Care of wounds and drainage Sutures removal Ambulation and exercise Naso gastric aspiration Care of chest drainage 	6

	 Ostomy care Gastrostomy Colostomy Entrostomy Blood component and therapy Practice universal precaution 	
Cardiology Ward	 Physical examination of the cardio vascular system recording and interpreting ECG Monitoring of patient Preparation and assisting in non-invasive and invasive diagnostic procedures Administer cardiac drugs Cardio pulmonary resuscitation Teach patient and families Practice medical and surgical asepsis-standard safety measures 	2
Skin and Communicable disease ward	 Assessment of patient with skin disorders Assist in diagnostic and therapeutic procedures Administer topical medication Practice medical and surgical asepsis-standard safety measures Use of personal protective equipment (PPE) Give medicated baths Counseling HIV positive patient Teach prevention of infection disease 	1
Orthopedic Ward	 Assessment of orthopedic patient Assist in application of plaster cast and removal of cast Apply skin traction, buck's traction Assists in application and removal prosthesis Physiotherapy and range of motion exercises 	2

	 (ROM), muscle strengthening exercises Crutch maneuvering technique Activities of daily living Ambulation Teach and counsel patients and families 	
Operation theatre	 Scrubbing, growing, gloving Identify instruments Suturing Material for common operations Disinfection, Carbolization, Fumigation Preparation of instrument sets for common operations Sterilization of sharp and other instruments Prepare OT table depending upon the operation Positioning and monitoring of the patient Endotracheal intubations Assisting in minor and major operations Handling specimens Disposal of waste as per guidelines 	6

INTERNSHIP

TIME: 260 HOUR (9 WEEKS)

ICU, CCU, CARDIAC OT.	Assist in arterial puncture for blood gas analysis	2
	 Perform ECG and interpret accordingly 	
	 Conduct and analysis pulse oxymetry 	
	Care with artificial airway	
	Assist in endotracheal intubations	

Neuro, ICU, ITU, OT	 Setting up ventilators Giving care in ventilators Drug sheet Observation of special procedure in OT Assess neurological status Implement care to head injury spinal injury Drug sheet Pre and Post operative care with Neuro surgery patients 	2
Burns and plastic reconstructive surgery	• Nursing	2
OT, Laparoscopic, Orthopedic, EYE, ENT	•	3

COMMUNITY HEALTH NURSING -I

Placement: Second Year Theory-90hrs

Practical-135Hours

Course Description: This course is designed for students to appreciate principles of promotion and maintenance of health.

UNIT	CONTENT	HOURS
UNIT-1	Introduction	2hrs.
	Community health nursing	
	Definition concept and dimension one of health	
	Promotion of health	
	Maintenance of health	
UNIT-2	Determinants of health	20hrs
	• Eugenics	
	• Environment	
	- Physical: air, light ventilation, water, housing, sanitation,	
	disposal of waste disposal of dead bodies, forestation, noise,	
	climate, communication: infrastructure facilities and linkage	
	- Acts regulating the environment: National pollution control	
	board	
	- Bacterial and viral: agents host carries and immunity	
	- Arthropods and rodents	
	• Food hygiene: production, preservation, purchase, preparation	
	consumption	
	• Act regulating food hygiene – prevention and food adulteration act,	
	drug and cosmetic act.	
	Socio- cultural	
	- Customs	
	- Marriage system	
	- Family structure	
	- Status of special group; Females children, elderly, challenged	

	groups and sick persons	
	Life style	
	Hygiene	
	Physical activity	
	- Recreation and sleep	
	- Sexual life	
	- Spiritual life philosophy	
	- Self reliance	
	- Dietary pattern	
	- Education	
	- Occupation	
	Financial management	
	- Income	
	- Budget	
	- Purchasing power	
	- Security	
UNIT-3	Epidemiology	10hrs
	• Definition: concept, aims, scope, uses and terminology used in	
	epidemiology	
	Dynamics of disease transmission: epidemiological triad	
	Morbidity an mortality: measurement	
	 Level of prevention 	
	Methods of epidemiology	
	- Descriptive	
	- Analytical: Epidemic investigation	
	- Experimental	
UNIT-4	Epidemiology and nursing management of common communicable	25 hrs
	disease	
	Respiratory infection	
	- Small pox	
	- Chicken pox	
	MeaslesInfluenza	
1	- Intiuenza	İ

- Rubella
- ARI's and Pneumonia
- Mumps
- Diphtheria
- Whooping cough
- Meningococcal Meningitis
- Tuberculosis
- SARS
- Intestinal infection
 - Poliomyelitis
 - Cholera
 - Diarrhoeal disease
 - Typhoid fever
 - Food poisoning
 - Amoebas
 - Hook worm infection
 - Ascariasis
 - Dracunculiasis
- Arthropods infection
 - Dengue
 - Malaria
 - Filariasis
- Zoonoses
- Viral
 - Rabies
 - Yellow fever
 - Japanese encephalitis
 - Kyasnur forest disease
- Bacterial
 - Brucellosis
 - Plague
 - Human Relationship
 - Anthrax
 - Leptospirosis
- Rickettsial disease

	- Rickettsial Zoonoses	
	- Scrub typhus	
	- Murine typhus	
	- Tick typhus	
	- Q fever	
	Parasitic Zoonoses	
	- Taeniasis	
	- Hydatid disease	
	- Lsieshmaniasis	
	Surface infection	
	- Trachoma	
	- Tetanus	
	- Leprosy	
	- STD & RTI	
	- Yaws	
	- HIV/AIDS	
	Any other	
UNIT-5	Epidemiology and nursing management of non communicable disease	10 Hrs
	Malnutrition under nutrition over nutrition nutritional deficiencies	
	Anemia	
	Hypertension	
	• Stroke	
	Rheumatic heart disease	
	Coronary heart disease	
	Coronary heart disease	
	Coronary heart disease Cancer	
	• Cancer	
	CancerDiabetes mellitus	
	CancerDiabetes mellitusBlindness	
	 Cancer Diabetes mellitus Blindness Accidents Mental illness 	
	 Cancer Diabetes mellitus Blindness Accidents Mental illness Obesity 	
	 Cancer Diabetes mellitus Blindness Accidents Mental illness Obesity Iodine deficiency 	
	 Cancer Diabetes mellitus Blindness Accidents Mental illness Obesity 	

UNIT-6	Demography Definition concept and scope Methods of collection analysis and interpretation of demographic data Demographic rates and ratio	6 Hrs
UNIT-7	Population and its control Population explosion and its impact on social economic development of individual society and country Population control Overall development: Women empowerment social economic and educational development.	17 Hrs
	 Limitation family size Promotion of small family norm Methods: spacing (natural, biological, chemical mechanical methods etc) Terminal surgical methods Emergency contraception 	

COMMUNITY HEALTH NURSING-1-PRACTICAL

Placement: Second Year Practical: 135hours

AREAS	SKILLS	DURATION (in weeks)
Community	Use techniques of interpersonal relation	2 wks urban
health nursing	Identification of health determinants of community	and 2 weeks
	History taking	rural
	Physical examination	
	Collect specimens-sputum, malaria smear	
	Perform simple lab test at center-blood for	
	hemoglobin and sugar, urine for albumin and sugar	
	Administer vaccines and medications to adults	
	Counsel and teach individual family and community	
	- Nutrition	
	- Hygiene	
	- Self –health monitoring	
	- Seeking health services	
	- Healthy life style	
	- Family welfare methods	

- Health promotion	

MICROBIOLOGY

Placement: First Year Hours: 60 (Theory 45+15lab)

Course Description: This course is designed to enable students to acquire understanding of fundamentals of microbiology and identification of various microorganisms. It also provides opportunities for practicing infection control measures in hospital and community settings.

UNIT	CONTENT	HOURS	
		Th	Pr
UNIT-1	Introduction	5hrs	
	Importance and relevance to nursing		
	Historical prospective		
	Concept and terminology		
	Principles of microbiology		

UNIT-2	General characteristics of microbes	10hrs	5hrs
	Structure and classification of microbes		
	Morphogical types		
	Size and form of bacteria		
	• Motility		
	 Colonization 		
	 Growth and nutrition of microbes 		
	- Temperature		
	- Moisture		
	- Blood and body fluids		
	Laboratory methods for identification of micro organisms		
	Staining techniques, gram staining, acid fast staining,		
	hanging drop preparation		
	Culture various medias		
UNIT-3	Infection control	10 Hrs	2 Hrs
	• Infection: Sources, portals of entry and exit, transmission		
	• Asepsis		
	Disinfection: Types and methods		
	Sterilization: Types and methods		
	 Chemotherapy and antibiotics 		
	Standard safety measures		
	Biomedical waste management		
	Role of nurse		
	Hospital acquired infection		
	Hospital infection control programme		
	- Protocols, collection of samples, preparation of		
	report and status of rate of infection in the unit/ hospital		
	nurses accountability continuing education etc.		

UNIT-4	Pathogenic organisms	12 Hrs	4 Hrs
	Micro organisms		
	- Cocci- Gram positive and gram negative		
	- Bacilli- Gram positive and gram negative		
	- Spirochete		
	- Mycoplasma		
	- Rickettsial		
	- Chyamyaide		
	• Viruses		
	Fungi-Superficial and deep mycosis		
	• Parasites		
	Rodents and vectors		
	Characteristics sources, portal of entry, transmission of		
	infection, identification of disease producing organisms,		
	Collection, handling and transportation of various specimens		
UNIT-5	Immunity	8Hrs	4Hrs
	Immunity- types , classification		
	Antigen and antibody reaction		
	Hypersensitivity- skin test		
	Serological test		
	- Vaccines & sera-types and classification,		
	storage and handling, cold chain		
	- Immunization for various diseases		
	- Immunization schedule		

MURS THIRD YEAR

MEDICAL SURGICAL NURSING (ADULT INCLUDING GERIATRICS)-II

Placement: Third Year Theory-120hrs

Practical -270Hours

Course Description: The purpose of this course is to acquire knowledge and develop proficiency in caring for patient with medical surgical disorders in varities health care settings and at home.

UNIT	CONTENT	HOURS
UNIT-1	Nursing management of patient with disorders of EAR, Nose and Throat	
	 Review of anatomy and physiology of the ear, nose and throat Nursing assessment: History and physically assessment Etiology, Pathophysiology, clinical manifestation, diagnosis 	
treatment modalities and medical and surgical management of ear nose and throat disorders. o External ear: deformities otalgia foreign bo tumors o Middle year- impacted wax, tympanic, n perforation, otitis media, and tumors. o Inner ear- Menier's disease, lybrinthitis, of tumors o Upper airway infections – Common cold,		
	ethinitis, rhinitis, pharyngitis, tonsillitis and adenoiditis, peritonsilar abscess, laryngitis. • Upper respiratory airway – epitaxis • Nasal obstruction, laryngeal obstruction, cancer of the larynx • Cancer of the oral cavity • Speech defects and speech therapy	

	• Deafness		
	Prevention control and rehabilitation		
	Haring aids, implanted hearing devices		
	Special therapies		
	Nursing procedures		
	Drugs used in treatment of disorders of ear, nose and throat		
	Role of nurse communication with hearing impaired and muteness		
UNIT-2	Nursing management of patient with disorder of eye		
	 Review of anatomy physiology of the eye 		
	Nursing management- history and physical assessment		
	• Etiology, Pathophysiology, clinical diagnosis, treatment		
	modalities and medical and surgical nursing management of the		
	eye disorders:		
	o Refractive errors		
	 Eyelids – infection, tumour and deformities 		
	 Conjunctiva – inflammation and infection bleeding 		
	 Cornea- inflammation and infection 		
	o Lens- cataract		
	o Glaucoma		
	o Disorders of posterior chamber and retina retinal and		
	vitreous problems		
	 Retinal detachment 		
	 Ocular emergency and their prevention 		
	• Blindness		
	National blindness control program		
	 Eye banking 		
	 Eye prostheses and rehabilitation 		
	Role of a nurse - Communication with visually impaired patient, eye		
	camps		
	Special therapies		
	Drugs used in treatment of disorder of eye		

UNIT-3 Nursing management of patient with neurological disorders 16hrs Review of anatomy and physiology of the neurological system Nursing assessment - history and physical and neurological assessment and Glasgow coma scale Etiology, Pathophysiology, clinical manifestation, diagnosis treatment modalities and medical and surgical nursing management of neurological disorders Congenital malformation Headache Head injuries Spinal injuries Paraplegia o Hemiplegia o Quadriplegia • Spinal cord compression – herniation of in vertebral disc Tumors of the brain and spinal cord Intra cranial and cerebral aneurysms Infection Meningitis, encephalitis, brain, abscess neurocysticerosis Movement disorders Chorea Seizures **Epilepsies** Cerebro vascular accidents (CVA) Cranial, spinal neuropathies – Beli's palsy trigeminal neuralgia

Peripheral Neuropathies: Guillainbarr's Syndrome

Myasthenia gravis

Multiple sclerosis

Degenerative disease

O Delirium

O Dementia

Alzheimer's disease Parkinson's disease

79

Management of unconscious patient and a patient with stroke Role of nurse in communicating with patient having neurological deficit Rehabilitation of patient with neurological deficit Role of nurse in long stay facility (institution) ad at home Special therapies Nursing procedures Drug used in treatment of neurological disorders UNIT-4 16 Hrs Nursing management of patients with disorder of female reproductive system Review of anatomy and physiology of female reproductive Nursing assessment – History and physical assessment Breast self examination Etiology, Pathophysiology, clinical manifestation, diagnosis treatment modalities and medical and surgical nursing management of disorder of female reproductive system Congenital abnormalities of female reproductive system Sexuality and reproductive health Menstrual disorders: Dysmenorrheal, amenorrhea premenstrual Abnormal uterine bleeding menorrhagia, metrorrhagia Pelvic inflammatory disease Ovarian and fallopian tune disorders: infection cysts tumors Uterine and cervical disorders: endometriosis polyps fibroids, cervical and uterine uterine displacement tumors, cystocele/uretherocele/rectocele Vaginal disorder: infection cysts, tumors Diseases of Breasts: deformities infection, cysts and tumors

Menopause and hormonal replacement therapy

Contraception types methods risk and effectiveness

Infertility

	 Barrier methods, intra uterine device, hormonal, post conceptional methods etc. Terminal methods Sterilization Emergency contraception methods Abortion – natural, medical and surgical abortion – MTP Act Toxic shock syndrome Injuries and trauma: Sexual violence Special therapies Nursing procedures Drug used in treatment of gynecological disorders National family welfare programme 	
UNIT-5	Nursing management of patient with burns, reconstructive and cosmetic surgery Review of anatomy and physiology of the skin and connective tissues and various deformities Nursing assessment – History and physical assessment and assessment of burns and fluid and electrolyte loss Etiology, Pathophysiology, clinical manifestation, diagnosis treatment modalities and medical surgical nursing management of burns and reconstructive and cosmetic surgery Types of r-constructive and cosmetic surgery for burns, congenital deformities, injuries and cosmetic purposes Role of nurse Legal aspects Rehabilitation Special therapies Psychosocial aspects Nursing procedures Drug used in treatment of burns, constructive and cosmetic surgery	10 Hrs
UNIT-6	Nursing management of patient with Oncological conditions Structure and characteristics of normal and cancer cells Nursing assessment- history and physically assessment	10 Hrs

	Prevention screening early detections warning sign of cancer	
	• Epidemiology, etiology classification, Pathophysiology staging	
	clinical manifestations diagnosis treatment modalities and medical	
	and surgical nursing management of Oncological condition	
	• Common malignancies of various body system oral, larynxes.	
	Lung, stomach, and colon, liver, leukemia's and lymphomas breast,	
	cervix, ovary, uterus, sarcoma, brain, renal, bladder, prostate etc.	
	Oncological emergencies	
	Modalities of treatment	
	 Immunotherapy 	
	 Chemotherapy 	
	o Radiotherapy	
	 Surgical intervention 	
	 Stem cell and bon marrow transplants 	
	o Gene therapy	
	 Other forms of treatment 	
	Psychological aspects of cancer	
	Rehabilitation	
	• Palliative care: Symptoms and pain management, nutritional	
	support	
	Home care	
	Hospice care	
	Stomal therapy	
	Special therapies	
	 Psychosocial therapies 	
	Nursing procedures	
Unit-7	Nursing management of patient in Emergency and Disaster situation	10 Hrs
	Disaster Nursing;	
	 Concept and principals of disaster nursing 	
	Causes and types of disaster; Natural and manmade	
	 Earthquake, floods, epide3mics, cyclones 	
	 Fire, explosion, accidents 	
	 Violence, terrorisom, biochemical, war 	
	Policies related to emergency/disaster management: institutional	
<u> </u>		I

- national state, institutional
- Disaster preparedness
- Team, guidelines, protocols, equipments, resources
- Co-ordination and involment of community various Govt departments, non govt, organizations and international agencies
- Role of nurse; working
- Legal aspects of disaster nursing
- Impact on health after effects: Post traumatic stress disorder
- Rehabilitation: physical, psychosocial, financial relocation Emergency nursing
- Concept, priorities, principles and scope and emergency nursing
- Organization of emergency services: physical set-up, staffing equipment and supplies, protocols, concept of triage and role of triage nurse
- Co-ordination and involvement of different departments and facilities
- Nursing assessment-history and physical assessment
- Etiology, classification, Pathophysiology, staging, clinical manifestation, staging, clinical manifestation, diagnosis, treatment modalities and medical and surgical nursing management of patient with medical and surgical emergency
- Principles of emergency management
- Common emergencies
- Cardiac emergencies
- Shock and hemorrhage
- Pain
- Poly-trauma, road accidents, crush, injuries, wound
- Bites
- Poisoning: food, gas, drugs and chemical poisoning
- Seizures
- Thermal emergencies; heat and cold injuries
- Pediatric emergencies
- Psychiatric emergencies
- Obstetrical emergencies

	Violence, abuse, sexual assault Gardio gulgranger responsitation	
	Cardio pulmonary resuscitation	
	Crisis intervention	
	Role of nurse: communication and interpersonal relations	
	Medico legal aspects	
UNIT-8	Nursing care of the elderly	10 Hrs
	Nursing assessment – history and physical assessment	
	Aging	
	Demography: Myths and realities	
	Concepts and theories of ageing	
	Cognitive aspects of ageing	
	Normal biological ageing	
	Age related body related changes	
	Psychosocial aspects of ageing	
	Medication and elderly	
	Stress and coping in elder patient	
	Common health problems and nursing management	
	Cardiovascular, respiratory, musculoskeletal	
	Endocrine, genitor-urinary, gastrointestinal	
	Neurological, skin and sensory organs	
	 Psychosocial and sexual 	
	 Abuse of elderly 	
	Role of nurse for care of elderly: ambulation nutritional	
	communicational psychosocial and spiritual	
	Role of family and formal and non formal caregivers	
	Use of aids and prosthesis (hearing aids, dentures)	
	Legal and ethical issues	
	Provision and programme for elderly, privileges, community	
	programs and health services	
	Home and institutional care	
UNIT-9	Nursing management of patients in critical units	10 Hrs

Nursing assessment – history and physical assessment
Classification
Principles of critical care nursing
Organization: physical set-up, policies, staffing norms
Protocols, equipments, ventilators, cardiac monitors,
defibrillators
Resuscitation equipments
Infection control and protocols

MEDICAL SURGICAL NURSING (Adult and Geriatrics)- II Practical

Placement: Third Year Time Theory- 120hrs
Practical- 270hrs
Internship-430hrs

Areas	Skills to be developed	Duration (In weeks)
ENT	 Perform examination of car, nose and throat Assist with diagnostic procedures Assist with therapeutic procedures Instillation of drops Perform/assist with irrigations Apply ear bandage Perform tracheotomy care Teach patient and families 	1

	1	
Ophthalmology	Perform examination of eye	1
opininimology	Assist with diagnostic procedures	
	 Assist with diagnostic procedure Assist with therapeutic procedure 	
	Perform/assist with irrigations	
	Apply eye bandage	
	Apply eye dantageApply eye drops/ointment	
	 Apply eye drops/ontment Assist with foreign body removal 	
	Teach patient and families	
Neurology	Perform neurological examination	2
rearology	Use Glasgow coma scale	
	Assist diagnostic procedures	
	Assist with therapeutic procedures Transh particular and families.	
	Teach patient and families Period at the lattice of the latt	
	Participate in rehabilitation program	
Gynecology ward	Assist with gynecological examination	1
Synceology ward	Assist with gynecological examination Assist with diagnostic procedures	
	 Assist with diagnostic procedures Assist with therapeutic procedures 	
	 Teach patient and families 	
	Teach self Breast examination	
	Assist with PAP smear collection	
Burns Unit	Assessment of burns patient	1
Burns out	- Percentage of burns	
	- Degree of burns	
	Fluid and electrolyte replacement therapy	
	- Assess	
	- Calculate	
	- Replace	
	- Record intake/output	
	Care of burns wound	
	- Bathing	
	Dunning	

	- Dressing	
	 Perform active and passive exercises 	
	 Practical medical and surgical asepsis 	
	Counsel and teach patient and families	
	Participate in rehabilitation program	
Oncology Unit	Screen for common cancers-TNM classification	1
	Assist with diagnostic procedures	
	- Biopsies	
	- Pap smear	
	- Bone-marrow aspiration	
	Breast examination	
	 Assist with therapeutic procedures 	
	 Participate in various modalities of treatment 	
	- Chemotherapy	
	- Radiotherapy	
	- Pain management	
	- Stomaltherapy	
	- Hormonal therapy	
	- Immuno therapy	
	- Gene therapy	
	- Alternate therapy	
	Participate in palliative care	
	Counsel and teach patient families	
	- Self Breast Examination	
	- Warning signs	
	Participate in rehabilitation program	
	r r r r	
Critical care unit	 Monitoring of patients in ICU 	2
	Maintain flow sheets	
	 Care of patient on ventilators 	
	 Perform Endotracheal suction 	
	Demonstration use of ventilators, cardiac monitors	
	etc.	

	 Collect specimen and interprets ABG analysis Assist in arterial puncture Maintain CVP line Pulse oxymetry CPR-ALS Defibrillators Pace makers Bag-mask ventilation Emergency tray/trolley- Crash Cart Administration of drugs Infusion pump Epidural Intrathecal Intracardiac Total parenteral therapy Chest physiotherapy Perform active and passive exercises 	
Casualty/Emergency	 Counsel the patient and family in dealing with grieving and bereavement Practice "triage" Assist with assessment, examination, investigations and their interpretation, in emergency and disaster situation Assist in documentations Assist in legal procedures In emergency unit 	1
	 In emergency unit Participate in managing crowd Counsel the patient and family in dealing with grieving and bereavement

B.Sc. NURSING THIRD YEAR

MEDICAL SURGICAL NURSING (ADULT INCLUDING GERIATRICS)-II

Placement: Third Year Theory-120

Hours

Practical -270 Hours

Course Description: The purpose of this course is to acquire knowledge and develop proficiency in caring for patient with medical surgical disorders in varities of health care settings and at home.

UNIT	CONTENT	HOURS
UNIT-1	Nursing management of patient with disorders of EAR, Nose and Throat	15 Hrs
	 Review of anatomy and physiology of the ear, nose and throat Nursing assessment: History and physically assessment Etiology, Pathophysiology, clinical manifestation, diagnosis treatment modalities and medical and surgical nursing management of ear nose and throat disorders. External ear: deformities otalgia foreign bodies and tumors Middle year- impacted wax, tympanic, membrane perforation, otitis media, and tumors. 	
	 Inner ear- Menier's disease, lybrinthitis, ototoxicity 	

tumors Upper airway infections - Common cold, sinusitis ethinitis, rhinitis, pharyngitis, tonsillitis and adenoiditis, peritonsilar abscess, laryngitis. Upper respiratory airway – epitaxis Nasal obstruction, laryngeal obstruction, cancer of the larynx Cancer of the oral cavity Speech defects and speech therapy Deafness Prevention control and rehabilitation Hearing aids, implanted hearing devices Special therapies Nursing procedures Drugs used in treatment of disorders of ear, nose and throat Role of nurse communication with hearing impaired and muteness Nursing management of patient with disorders of eye Review of anatomy physiology of the eye Nursing management- history and physical assessment

UNIT-2

- 15 Hrs
- Etiology, Pathophysiology, clinical diagnosis, modalities and medical and surgical nursing management of the eve disorders:
 - Refractive errors
 - Eyelids infection, tumour and deformities
 - Conjunctiva inflammation and infection bleeding
 - Cornea- inflammation and infection
 - Lens- cataract
 - Glaucoma
 - Disorders of posterior chamber and retina retinal and vitreous problems
 - Retinal detachment
 - Ocular emergency and their prevention
- Blindness
- National blindness control program

Child Health Nursing

Placement: Third Year Time: Theory-90hrs

Practical-270hrs
Internship – 145hrs

Course Description: This is designed for developing an understanding of the modern approach to childcare, identification, prevention and nursing management of common health problems of neonates and children

UNIT	CONTENT	TIME (HRS)
I	Introduction	15
	Modern concept of child care	
	Internationally accepted rights of the child	
	National policy and legislation in relation to child health and welfare	
	Agencies related to welfare services to the children	
	• Changing trends in hospital care preventive, promotive and curative aspects of child health	
	 Child morbidity and mortality rates 	
	Difference between an adult and child	
	Hospital environment for sick child	
	Impact of hospitalization on the child and family	
	Grief and bereavement	
	The role of a child health nurse in caring of a hospitalized child	
	Principles of pre and post operative care of infants and children	
	Child health nursing procedures	
II	The healthy child	20
	Principles of grows and development	
	Factors-effecting growth and development	
	Growth and development from birth to adolescence	

	The needs of normal children through the stages of development and	
	parental guidance	
	Nutritional needs of children and infants exclusive breast- feeding	
	supplementary / artificial feeding and weaning.	
	Baby friendly hospital concept	
	Accidents causes and prevention	
	Value of play and selection of play material	
	Prevention immunization, immunization program and cold chain	
	Preventive pediatrics	
	Care of under five and under five clinics/well baby clinics	
III	Nursing care of neonates	15
	Nursing care of a normal new born/Essential newborn care	
	Neonatal resuscitation	
	Nursing management of a low birth weight baby	
	Kangaroo mother care	
	Nursing management of common neonatal disorder	
	Organization of neonatal unit	
	Identification and nursing management of common congenital	
	malformations.	
IV	Integrated management of neonatal and childhood illness (IMNCI)	10
V	Nursing management in common childhood disease	20
	Nutritional deficiency disorders	
	Respiratory disorder and infections	
	Gastro intestinal infections, infestations and congenital disorders	
	Cardiovascular problem; congenital defects and rheumatic fever,	
	rheumatic heart disease	
	Genito-urinary disorder: acute glomerular nephritis, Nephrotic	
	syndrome, Wilm's tumour, infection and congenital disorder	
	Neurological infections and disorder conclusions, epilepsy	
	meningitis hydrocephalus, spina-bifida	
	Hematogical disorders, club feet hip dislocation and fracture	
	Disorder of skin eye and ears

MENTAL HEALTH NURSING

Placement: Third Year Theory-90hrs
Practical-270Hours

Internship – 95Hours (2 weeks)

Course Description: This course is designed for developing and understanding of the modern approach to mental health, identification, prevention and nursing management of common mental problem with special emphasis on therapeutic intervention for individual's family and community.

UNIT	CONTENT	HOURS
UNIT-1	Introduction	5 hrs
	Perspectives of mental health and mental health nursing	
	evolution of mental health services, treatments and nursing	
	practices	
	Prevalence and incidence of mental health problems and	
	disorders	
	Mental health Act.	
	National mental health policy	
	National mental health programme	
	Mental health team	

	Nature and scope of mental health nursing	
	• Role and functions of mental health nurse in various settings	
	and factors affecting the level of nursing practice	
	Concepts of normal and abnormal behavior	
UNIT-2	Principles and concepts of mental health nursing	8 hrs
	Definition: Mental health nursing and terminology used	
	Classification of mental disorders: ICD	
	Review of personality development defense mechanism	
	Maladaptive behavior of individuals and group stress crisis and	
	disaster (s)	
	Etiology bio-psycho-social factors	
	Psychopathology of mental disorders review of structure and	
	function of brain, limbic system and abnormal neuro	
	transmission	
	Principles of mental health nursing	
	Standards of mental health nursing practices	
	Conceptual model and role nurse	
	o Existential model	
	 Psycho- analytical model 	
	o Behavior model	
	o Interpersonal model	
UNIT-3	Assessment of mental health status	8 Hrs
	History taking	
	Mental health examination	
	Mini mental health examination	
	Neurological examination review	
	 Investigations related blood EEG, ECT, MRI 	
	Psychological tests	
	Role and responsibilities of nurse	
UNIT-4	Therapeutic communication and the nurse-patient relationship	6 Hrs
	Therapeutic communication types techniques, characteristics	

	Types of relationship	
	Ethics and responsibilities	
	Element of nurse patient contract	
	Review of technique of JPR – Johari windows	
	Goals, phases, tasks, therapeutic techniques	
	 Therapeutics impasse and its intervention 	
	Therapeuties impasse and its intervention	
UNIT-5	Treatment modalities and therapies used in mental disorders	14 hrs
	Psycho pharmacology	
	Psychological therapies; therapeutic community, psycho	
	therapy, psychoanalytical cognitive and supportive family	
	group, behavioral, play, psycho drama, Music, dance	
	recreational and light therapy, relaxation therapies, yoga	
	meditation, bio feedback	
	Alternative system of medicine	
	Occupational therapy	
	Physical therapy; electro conclusive therapy	
	Geriatric considerations	
	Role of nurse in above therapies	
UNIT-6	Nursing management of patient with Schizophrenia and other	5 Hrs
	psychotic disorders	
	Classification; ICD	
	Etiology, psycho-pathology types, clinical manifestations	
	diagnosis	
	Nursing assessment – history and physical assessment and	
	mental assessment	
	Treatment modalities and nursing management of patient with	
	schizophrenia and other psychotic disorders	
	Geriatric considerations	
	Follow-up and home care and rehabilitation	
UNIT-7	Nursing management of patient with mood disorders	5 hrs
	Mood disorders: Bipolar affective disorder, Mania depression	

	and dysthamia etc.	
	 Etiology, psycho-pathology, types clinical manifestations 	
	diagnosis	
	Nursing assessment – history and physical assessment The state of the state o	
	Treatment modalities and nursing management of patient with	
	mood disorder	
	Geriatric considerations	
	Follow-up and home care and rehabilitation	
UNIT-8	Nuvering management of nations with neurosis stress related and	8 Hrs
UN11-0	Nursing management of patient with neurotic stress related and somatization disorders.	опг
	Anxiety disorders, phobias, dissociation and conversion	
	disorders, obsessive compulsive disorder somatoform disorder,	
	post traumatic disorder	
	Etiology, psycho-pathology clinical manifestations, diagnosis	
	Nursing assessment – History physical and mental assessment	
	Treatment modalities and nursing management of patients	
	Geriatric considerations	
	Follow-up and home care and rehabilitation	
LINITE O		<i>5</i> 1
UNIT-9	Nursing management of patient with substance use and disorder	5 hrs
	Community used psychotropic substance : classification forms,	
	routes action, intoxication and withdrawal	
	Etiology of dependence tolerance, psychological and physical	
	dependence, withdrawal syndrome diagnosis	
	Nursing assessment – history physical mental assessment and	
	drug assay	
	• Treatment (detoxification, antagonist therapy and harm	
	reduction) and nursing management of patient with substance	
	abuse.	
	Geriatric considerations	
	Follow-up and home care rehabilitation	
	<u> </u>	

UNIT-10	Nursing management of patient with personality, sexual and eating	4 Hrs
	disorders	
	Classification of disorders	
	Etiology, psycho-pathology, clinical manifestation, diagnosis	
	Nursing assessment- history, physical mental assessment	
	Treatment modalities and nursing management of patients with	
	personality, sexual and eating disorders	
	Treatment modalities and nursing management of	
UNIT-11	Nursing management of childhood and adolescent disorders	6 hrs
	including mental deficiency	
	Classification	
	Etiology, psycho-pathology clinical manifestation, diagnosis	
	Nursing assessment- History, physical, mental assessment and	
	IQ assessment	
	Treatment modalities and nursing management of childhood	
	and adolescent disorder including mental deficiency	
	Follow-up and home care and rehabilitation	

B.Sc. NURSING FOURTH YEAR

MIDWIEFRY AND OBSTETRICAL NURSING

Placement: Fourth Year Theory – 90 hrs.
Practical – 180 Hours.

Course Description: This course is designed for students to appreciate the concept any principles of midwifery and obstetrical nursing. It helps them to acquire knowledge and skills in rendering nursing care to normal and high risk pregnant women during antenatal, natal & postnatal periods in hospital and community settings. It also helps to develop skills in managing normal an high risk neonates and participates in family welfare programme.

UNIT	CONTENT	HOURS
UNIT – 1	Introduction to midwifery and obstetrical nursing	3 hrs.
	 Introduction to concept of midwifery and obstetrical nursing. Trends in midwifery and obstetrical nursing. Historical perspective and current trends Legal and ethical aspects. Pre- conception care & preparing for parenthood. Role of nursing in midwifery & obstetrical care. National policy and legislation in relation to ,maternal health and welfare. 	

	M 1 1:12 11:12 10:12	
	Maternal morbidity, mortality and fertility rates.	
	o Prenatal morbidity, mortality rates.	
UNIT - 2	Review of anatomy and physiology of female reproductive and fetal development. • Female pelvis- general description of the bones joint. Ligaments, planes of the pelvis diameters of the true pelvis. Important landmarks, variations in pelvic shapes. • Female organs of reproductive: external genital, internal genital organs and their anatomical relation, musculature blood supply, nerves, lymphatic, pelvic cellular tissue, pelvic peritoneum. • Physiology of menstrual cycle. • Human sexuality • Fetal development • Conception • Review of fertilization, implantation, development of the embryo and placenta at term functions. Abnormalities, the fetal sac amniotic fluid the umbilical chord. • Fetal circulation, fetal skull, bones, sutures and measurement. • Review of genetics.	8 hrs.
UNIT - 3	Assessment and management of pregnancy (ante- natal) Normal Pregnancy Physiological changes during pregnancy Reproductive system Cardiovascular system Respiratory system Urinary system Gastro intestinal system Metabolic changes Skeletal changes Skeletal changes Skin changes Endocrine system Physiological changes Discomfort of pregnancy Diagnosis of pregnancy Signs Differential diagnosis Confirmatory tests. Ante natal care Objectives Assessment History and physical examination Antenatal examination Signs of previous child birth Relationship of fetus to uterus and pelvic lie, attitude, presentation, position. Pervaginal examination	8 hrs.

	 Screening and assessment for high risk 	
	Risk approach	
	History and physical examination	
	Modalities of diagnosis, invasive and non invasive, ultrasonic	
	cardio tomography, NST, CST.	
	Antenatal preparation	
	o Antenatal counseling	
	 Antenatal exercise 	
	 Diet, Substance use 	
	 Education for child birth, Husband and families 	
	 Preparation for self confinement 	
	 Prevention fro radiation 	
	Psycho – social and cultural aspects.	
	A street of the	
	O Unwed mother	
	o Single parent	
	 Teenage pregnancy 	
	o sexual violence	
	Adoption	
TINITE '		10.1
UNIT – 4	Assessment and management of intranatal period	12 hrs.
	 physiology of labour 	
	management of labour	
	• First stage	
	 Sign & symptoms of onset of labor normal and 	
	abnormal	
	o Preparation of	
	✓ Labour room	
	✓ Woman	
	 Assessment and observation of women in labor. 	
	Partogram – maternal and fetal monitoring	
	 Active management of labour, induction of labour. 	
	 Pain relief and comfort in labours 	
	Second stage	
	 Sign & symptoms : normal & abnormal 	
	Duration	
	Episiotomies (only if required) Receiving the pay bern	
	o Receiving the new born	
	- Neonatal resuscitation : initial steps and subsequent	
	resuscitation	
	- Care of umbilical cord.	
	 Immediate assessment including screening for 	
	congenital anomalies.	
	- Identification	
	- Bonding	
	- Initiate feeding	
	- Screening and transportation of the neonate.	
	Third stage	
	Sign & symptoms : normal & abnormal	
	Num at comprome "normal at annormal	

		Т
	o Duration	
	 Method of placenta expulsion 	
	 Management : principles and technique 	
	 Examination of the placenta 	
	 Examination of perineum 	
	Maintaining records and reports	
	• Fourth stage	
	1 our in stage	
UNIT - 5	Assessment and management of women during post natal period	5 hrs
	Normal puerperium : physiology duration	
	Postnatal assessment and management	
	 Promoting physical and emotional well big 	
	Lactation management	
	o Immunization	
	Family dynamics after child birth	
	D 11 10 1 1 1 1	
	• Follow – up	
	Records and reports	
UNIT -6	Assessment and management of normal neonates	6 hrs.
	Normal Neonate	
	 Physiological adaptation 	
	o Initial and daily assessment	
	Essential newborn care , thermal control	
	 Breast feeding, prevention of infections 	
	• Immunization	
	Minor disorders of newborn and its management	
	Level of neonatal care (level I,III & III)	
	At primary, secondary & tertiary levels. Maintenance or reports and records.	
	Maintenance o reports and records.	
UNIT -7	High risk pregnancy – assessment and management	10 hrs.
	 screening and assessment 	
	 Ultrasonic, cardio tomography, NST, CST, 	
	 Non invasive and invasive. 	
	 Newer modalities of diagnosis 	
	 High risk and approach 	
	 Levels of care primary, secondary and tertiary levels 	
	Disorders of pregnancy	
	 Hyper – emesis gravid arum bleeding in early 	
	pregnancy, ,abortion ectopic	
	o Pregnancy, vesicular mole	
	 Ante – partum hemorrhage 	
	Uterine abnormality and displacement	
	Diseases complicating pregnancy	
	Medical and surgical conditions	
	o Infection, RTI (STD), UTI HIV, TORCH	
	o Gynecological disease complicating pregnancy	
	o Pregnancy included hypertension and diabetes,	
	toxemia of pregnancy, hydramnios.	
	 Rh incompatibility 	

	 Mental pregnancy 	
	 Abnormalities of placenta and cord 	
	 Intra – Uterine growth retardation 	
	 Nursing management of mothers with high risk 	
	pregnancy	
	Maintenance of records and reports.	
UNIT -8	Abnormal labor – assessment and management	
	Disorders in labour	
	CPD and contracted pelvis	
	 Mal position and Mal presentations 	
	o Premature labour, disorders of uterine action	
	precipitate labor prolonged labour.	
	 Complication of third stage : injuries to birth canal 	
	Obstetrical emergencies and their management :	
	 Presentation and prolapsed of cord. Vasa- praveia. 	
	Amniotic fluid, embolism, rupture of uterus, shoulder	
	dystocia, obstetrical shock.	
	Obstacles procedure and operation :	
	 Introduction of labour, forceps, vacuum version. 	
	Manual removal of placenta, caesarean section	
	destructive operations.	
	Nursing management of women undergoing obstetrical	
	operation and procedures.	
	operation and procedures.	
UNIT - 9	Abnormalities during postnatal period.	4 hrs.

Nursing Research and Statistics

Placement: Fourth Year Time: Theory – 45 hrs.
Internship Practical –45 hrs.

Course Description: The course is designed to enable students to develop an understanding of basic concept of research. Research process and statistics. It is further structured to conduct participate in need based research studies in various setting and utilize the research findings to provide quality nursing care. The hours for practical will be utilized the research findings to provide quality nursing care. The hours for practical will be utilized for conducting individual / group research project.

Unit	Content	Time (hrs.)
I	Research and research process	4
	 Introduction and need for nursing Definition of research and nursing research Steps of scientific method Characteristics of good research Steps of Research process- overview. 	
II	Research Problem Question	3
	 Identification of problem area Problem statement Criteria of a good research problem Writing objectives 	
Ш	Review of Literature	3
	 location sources On line search; CINHAL, COCHRANE, etc Purpose Methods of review 	
IV	Research approaches and designs	4
	Historical, survey and experimentalQualitative and quantitative designs	

V	Sampling and data collection	8
	 Definition of population, sample, sampling criteria, factors influencing sampling techniques Data- why, what, from, whom, when and where to collect Data collection methods and instruments: Methods of collection Questioning, interviewing Observation record and analysis and measurement 	
	 Types of instruments Validity and reliability of the instruments Pilot study Data collection procedure 	
VI	Analysis of data	4
	Complication, Tabulation, classification summarization, presentation interpretation of data.	
VII	Introduction to statistics	15
	 Definition, use of statistic, scales of measurement Frequency distribution and graphical presentation of data Mean, Median, Mode, Standard Deviation Normal probability and tests of significance Co- efficient of correlation Statistical packages and its application 	
VIII	Communication and utilization of Research	4
	 Communication of research findings Verbal report Writing research report Writing scientific article/ paper critical review of published research utilization of research findings 	

Management of Nursing Services and Education
